The Paper Tiger Guide To Tv Repair:

The Paper Tiger Guide to Tv Repair Paper Tiger Television Collective (Firm),1992 *Art vs. TV* Francesco Spampinato,2021-12-02 While highlighting the prevailing role of television in Western societies *Art vs TV* maps and condenses a comprehensive history of the relationships of art and television With a particular focus on the link between reality and representation Francesco Spampinato analyzes video art works installations performances interventions and television programs made by contemporary artists as forms of resistance to and appropriation and parody of mainstream television The artists discussed belong to different generations those that emerged in the 1960s in association with art movements such as Pop Art Fluxus and Happening and those appearing on the scene in the 1980s whose work aimed at deconstructing media representation in line with postmodernist theories to those arriving in the 2000s an era in which through reality shows and the Internet anybody could potentially become a media personality and finally those active in the 2010s whose work reflects on how old media like television has definitively vaporized through the electronic highways of cyberspace These works and phenomena elicit a tension between art and television exposing an incongruence an impossibility not only to converge but at the very least to open up a dialogical exchange

Hand-held Visions DeeDee Halleck,2002 For almost forty years DeeDee Halleck has been involved in a variety of projects that involve media making by non professionals Her goal has been to develop a critical sense of the potential and limitations of mediated communication through practical exercises that generate a sense of both individual and non hierarchical group power over the various apparati of media and electronic technology *Hand Held Visions* is a collection of essays presentations and lectures that she has written throughout this process Halleck starts with a discussion of her own development as a teacher producer and an active participant in the struggle for media democracy She gives the reader a historical first person perspective on the community based media movement and a sense of the determination and resolve that have enabled often fragile and much embattled organizations and individuals to survive in a climate dominated by global media corporations that are in direct opposition to their work

A Social History of Contemporary Democratic Media Jesse Drew,2013-05-02 The last few decades have helped dispel the myth that media should remain driven by high end professionals and market share This book puts forward the concept of communications from below in contrast to the globalization from above that characterizes many new developments in international organization and media practices By examining the social and technological roots that influence current media evolution Drew allows readers to understand not only the Youtubes and Facebooks of today but to anticipate the trajectory of the technologies to come Beginning with a look at the inherent weaknesses of the U S broadcasting model of mass media Drew outlines the early 1960s and 1970s experiments in grassroots media where artists and activists began to re engineer electronic technologies to target local communities and underserved audiences From these local projects emerged national and international communications projects creating production models social networks

and citizen expectations that would challenge traditional means of electronic media and cultural production Drew's perspective puts the social and cultural use of the user at the center not the particular media form Thus the structure of the book focuses on the local the national and the global desire for communications regardless of the means
