What Is Africa's Problem:

What is Africa's Problem? Yoweri Museveni, 2000 Recent seismic shifts in Congo and Rwanda have exposed the continued volatility of the state of affairs in central Africa As African states have shaken off their postcolonial despots new leaders with sweeping ideas about a pan African alliance have emerged and yet the internecine struggles go on What is Africa's problem As one of the leaders expressing a broad and forceful vision for Africa's future Uganda's Yoweri K Museveni is perhaps better placed than anyone in the world to address the very question his book poses In 1986 after more than a decade of armed struggle a rebellion led by Museveni toppled the dictatorship of Idi Amin and Museveni at 42 became president of Uganda a country at that time in near total disarray Since then Uganda has made remarkable strides in political civic and economic arenas and Museveni has assumed the role of the eminence grise of the new leadership in central Africa Philip Gourevitch *The New Yorker* As such he has proven a powerful force for change not just in Uganda but across the turbulent span of African states This collection of Museveni's writings and speeches lays out the possibilities for social change in Africa Working with a broad historical understanding and an intimate knowledge of the problems at hand Museveni describes how movements can be formed to foster democracy how class consciousness can transcend tribal differences in the development of democratic institutions and how the politics of identity operate in postcolonial Africa Museveni's own contributions to the overthrow of Zaire's Mobutu Sese Seko and to the political transformation of Uganda suggest the kind of change that may sweep Africa in decades to come *What Is Africa's Problem* gives a firsthand look at what those changes might be how they might come about and what they might mean *What Is Africa's Problem* Yoweri Museveni, 2000

The State in Africa Tatah Mentan, 2025-09-28 This book critically analyzes the complex relationship between the African state and capitalist globalization It describes in great detail the significant effects of the various historical trajectories of global capitalist expansion on the nature and functions of the African state while focusing on the present triumph of globalized neo liberalism on the African continent The history of the state in Africa has been misread and misinterpreted through the Eurocentric convictions of European African scholars alike The State in Africa has since its colonial inception has served as the best possible political shell for capitalism enabling it to penetrate again possession and establish itself firmly and securely regardless of institutional and leadership instability at the helm The glaring artificiality of the state in Africa coupled with the failure of the local ruling classes to rise above the limitations of their provenance is to blame for the myriad crises of one party authoritarianism violent coups and military dictatorship It is also to blame for the

progressive alienation of the African people and the prevailing crises of identity and citizenship Independence does not seem to have changed much as the state is still controlled by the most powerful foreign economically dominant class which has appropriated political power as well to further compound the subjection and exploitation of the oppressed Africans Today the continent continues to grapple with underdevelopment civil wars intra state conflicts political instability state failure and outright collapse thus calling into question the viability and survivability of the Westphalian state model in Africa
