School & Society James McKeen Cattell,Will Carson Ryan,Raymond Walters,1924 **Measuring Intelligence** David J. Bartholomew,2004-08-26 The testing of intelligence has a long and controversial history Claims that it is a pseudo science or a weapon of ideological warfare have been commonplace and there is not even a consensus as to whether intelligence exists and if it does whether it can be measured As a result the debate about it has centred on the nurture versus nature controversy and especially on alleged racial differences and the heritability of intelligence all of which have major policy implications This book aims to penetrate the mists of controversy ideology and prejudice by providing a clear non mathematical framework for the definition and measurement of intelligence derived from modern factor analysis Building on this framework and drawing on everyday ideas the author address key controversies in a clear and accessible style and explores some of the claims made by well known writers in the field such as Stephen Jay Gould and Michael Howe
