Wild Life Conservation

Shane P. Mahoney, Valerius Geist

Wild Life Conservation:

The North American Model of Wildlife Conservation Shane P. Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue recovery and future of our wildlife resources At the end of the nineteenth century North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction market hunting and unrelenting subsistence killing This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process not merely halting the extinctions but returning wildlife to abundance While there was great understanding of how to manage wildlife in Europe where wildlife management was an old mature profession Continental methods depended on social values often unacceptable to North Americans Even Canada a loyal colony of England abandoned wildlife management as practiced in the mother country and joined forces with like minded Americans to develop a revolutionary system of wildlife conservation In time and surviving the close scrutiny and hard ongoing debate of open democratic societies this series of conservation practices became known as the North American Model of Wildlife Conservation In this book editors Shane P Mahoney and Valerius Geist both leading authorities on the North American Model bring together their expert colleagues to provide a comprehensive overview of the origins achievements and shortcomings of this highly successful conservation approach This volume reviews the emergence of conservation in late nineteenth early twentieth century North America provides detailed explorations of the Model s institutions principles laws and policies places the Model within ecological cultural and socioeconomic contexts describes the many economic social and cultural benefits of wildlife restoration and management addresses the Model s challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation Written for wildlife professionals researchers and students this book explores the factors that helped fashion an enduring conservation system one that has not only rescued recovered and sustainably utilized wildlife for over a century but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology Contributors Leonard A Brennan Rosie Cooney James L Cummins Kathryn Frens Valerius Geist James R Heffelfinger David G Hewitt Paul R Krausman Shane P Mahoney John F Organ James Peek William Porter John Sandlos James A Schaefer

Environmental Law in Taiwan Anton Ming-Zhi Gao, 2023-01-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Taiwan A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management

covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Taiwan Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy *Officials and Organizations Concerned with Wildlife Protection* U.S. Fish and Wildlife Service,1914 Wildlife Management and Conservation Paul R. Krausman,James W. Cain III,2022-09-20 The definitive textbook for students of wildlife management now updated to cover the latest techniques tools and topics Shortlisted for The Wildlife Society Outstanding Edited Book by The Wildlife Society Wildlife Management and Conservation presents a clear overview of the management and conservation of animals their habitats and how people influence both The relationship among these three components of wildlife management is explained in chapters written by leading experts and is designed to prepare students for careers in which they will be charged with maintaining healthy animal populations To be successful wildlife professionals they will need to find ways to restore depleted populations reduce overabundant introduced or pest species and manage relationships among various human stakeholders This book gives them the basic knowledge necessary to accomplish these goals This second edition which is updated throughout features several new and expanded topics including communication in the wildlife profession fire science Indigenous models of management and conservation plant animal interactions quantitative analysis of wildlife populations and a detailed glossary The book also covers Human dimensions of wildlife management Animal behavior Predator prey relationships Structured decision making Issues of scale in wildlife management Wildlife health Historical context of wildlife management and conservation Hunting and trapping Nongame species Nutrition ecology Water management Climate change Conservation planning The most widely used foundational text in the field this is the perfect resource not only for students but also for early career professionals and those in related fields who need to understand the core tenets and tools of wildlife conservation and management Contributors C Jane Anderson Bart M Ballard Warren B Ballard John A Bissonette Clint Boal Scott B Boyle Leonard A Brennan Robert D Brown James W Cain III Tyler A Campbell Michael J Cherry Michael R Conover Daniel J Decker Randall W DeYoung Jonathan B Dinkins W Sue Fairbanks Selma N Glasscock James B Grand Michael J Haney James R Heffelfinger Scott E Henke Fidel Hernandez Davie G Hewitt C L Hoving David A Jessup Heather E Johnson Winifred B Kessler John L Koprowski Paul R Krausman William P Kuvlesky Jr Roel R Lopez R W Mannan Melissa J Merrick L Scott Mills Michael S Mitchell Michael L Morrison Anna M Mu oz John F Organ Katherine L Parker William F Porter Shawn J Riley Steven S Rosenstock Michael C Runge Susan P Rupp William F Siemer Robert J Steidl

Kelley M Stewart Wildlife Conservation and Management Initiatives in Nagaland, 2013 **National Wildlife Refuges** United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment, 1980 Wildlife Conservation and Tourism in Kenya Daniel Musili Nyeki, 1993 Australian National Bibliography: 1992 National Library of Australia, 1988 **Wildlife Field Research and Conservation Training Manual** Alan Rabinowitz, 1993 Fish and Wildlife Miscellaneous United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment, 1975 *Conservation of Wildlife Populations* L. Scott Mills, 2009-03-12 Professor L Scott Mills has been named a 2009 Guggenheim Fellow by the board of trustees of the John Simon Guggenheim Memorial Foundation Conservation of Wildlife Populations provides an accessible introduction to the most relevant concepts and principles for solving real world management problems in wildlife and conservation biology Bringing together insights from traditionally disparate disciplines the book shows how population biology addresses important questions involving the harvest monitoring and conservation of wildlife populations Covers the most up to date approaches for assessing factors that affect both population growth and interactions with other species including predation genetic changes harvest introduced species viability analysis and habitat loss and fragmentation Is an essential guide for undergraduates and postgraduate students of wildlife biology conservation biology ecology and environmental studies and an invaluable resource for practising managers on how population biology can be applied to wildlife conservation and management Artwork from the book is available to instructors online at <http://www.blackwellpublishing.com/mills> www.blackwellpublishing.com/mills An Instructor manual CD ROM for this title is available Please contact our Higher Education team at HigherEducation@wiley.com HigherEducation@wiley.com for more information **Saving Endangered Species** Robert W. Shumaker, 2020-10-27 The amazing true stories of the greatest wildlife champions of our time Wildlife conservation is at a critical juncture While large charismatic mammals may be the first animals that come to mind the mere 3 000 wild tigers still in existence the giraffes declared endangered for the first time just last year it is not only these magnificent keystone species disappearing A full third of all studied birds reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered including crucial pollinators that sustain worldwide food supply Over 15 000 animal species are now considered to be threatened with extinction There are however bright spots that provide optimism many of them due to the efforts of a small group of scientists and activists In *Saving Endangered Species* Robert W Shumaker brings together ten conservation heroes seven of them winners of the Indianapolis Prize three of them recipients of the Jane Alexander Global Wildlife Ambassador Award With moving immediacy each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world Bringing to life their work in the field each contributor also explains key concepts in wildlife conservation reveals why they are important and discusses what kinds of work can be done to address biodiversity loss

Contributors sharing their stories in their own words include George Schaller one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world's largest wildlife preserve the Arctic National Wildlife Refuge Iain Douglas Hamilton who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for ivory in Africa Steven Amstrup who discovered the disturbing truth that the sea ice polar bears rely on for traveling hunting and raising their young was disappearing Russell Mittermeier who has discovered over 20 new animal species conducted field work in more than 30 countries around the globe and authored 15 books on biodiversity Harrison Ford Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years Sigourney Weaver three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo This unique book aims to win new recruits inspire biologists and conservationists already in the field and illustrate the profession's fundamental scientific tenets through wildlife champions own exciting narratives Covering issues from reproduction and prey predator relationships to population dynamics and community engagement Saving Endangered Species also addresses such thorny topics as overhunting retaliatory killing by farmers development driven habitat loss and the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright

Conservation and the Use of Wildlife Resources Melvin Bolton, 2012-12-06 Not everybody cares about the fate of wild animals or the state of the natural environment I met a lady who said it wouldn't worry her if all the wild animals in the world disappeared overnight She was a city person she said There are also people who would prefer to let animals become extinct than to have them kept in captivity no matter how progressive the zoo There are those who on principle will not eat meat let alone do the killing and there are those who enjoy nothing so much as shooting birds People in the last two camps may oppose each other in claiming to be conservationists Extremists are unlikely to find their opinions being reversed by this book but because of the scope of the subject I believe there is a good chance that anybody with an interest in wildlife will find in it something new to think about It may not be too much to hope that a few disagreements might also be settled because I suspect there is more common ground than is generally realized among those with opposing views
