Wild Sage:

Uses of Plants by the Indians of the Missouri River Region Melvin Randolph Gilmore,1919 Merck's Report
Theodore Weicker,1914 *Essential Oils* AntonC. deGroot,Erich Schmidt,2021-04-12 Essential Oils Contact Allergy and
Chemical Composition provides a full review of contact allergy to essential oils along with detailed analyses of the chemical
composition of essential oils known to cause contact allergy In addition to literature data this book presents the results of
nearly 6 400 previously unpublished sample analyses by far the largest set of essential oils analyses ever reported in a single
source of scientific literature Covering 91 essential oils and two absolutes the book presents an alphabetical list of all 4 350
ingredients that have been identified in them a list of chemicals known to cause contact allergy and allergic contact
dermatitis and tabular indications of the ingredients that can be found in each essential oil The book discusses contact
allergy and allergic contact dermatitis for each of the oils and absolutes sometimes able to provide only one or two reports
but drawing upon considerable amounts of literature in other cases such as with tea tree oil ylang ylang oil lavender oil rose
oil turpentine oil jasmine absolute and sandalwood oil While limited information on the main components and their
concentrations would be enough for most dermatologists this book gives extensive coverage not only to improve levels of
medical knowledge and quality of patient care but also for the benefit of professionals beyond clinical study and practice
such as chemists in the perfume and cosmetics industries perfumers academic scientists working with essential oils and
fragrances aromatherapists legislators and those involved in the production sale and acquisition of essential oils **Hood's**
