Wild Flower Key:

The Wild Flower Key, 1981 A guide to the wild flowers of the British Isles and North West Europe describing 1400 species

The Wild Flower Key Francis Rose, Clare O'Reilly, 2006 This wild flower identification guide was first published in 1981 and is still widely accepted as the best of its kind for its combination of meticulous illustrations and the use of keys to aid recognition For this new edition the Latin names have been revised in accordance with the current classification system It is now published as the ideal book for the serious student of British and north west European wild plants providing a bridge between picture identification guides and the non illustrated academic floras

A New Key to Wild Flowers John Hayward, 1987 This is an original key for the naming of flowers trees grasses sedges rushes and ferns in the British Isles No expert botanical knowledge is expected of the user and with a little practice the key can quickly be mastered The key is not a descriptive flora but is a handy means to rapid identification which should be useful to students of all ages and to all who like to know the names of flowers but are discouraged by more sophisticated wordy floras This flora breaks new ground in wild flower identification in adopting a novel approach It has its origins in courses run by the author where a simple field key was required that could give rapid results and was based upon easily seen characters Subsequent extensive testing through the AIDGAP Aids to Identification in Difficult Groups of Animals and Plants organisation has further refined the key as a working tool for field and bench use
