Sustainable Wildlife Tourism Abel Ansporthy Mamboleo, 2025-09-30 This book advocates transitioning from a conventional to a sustainable wildlife tourism paradigm by adopting principles of sustainable development providing a detailed concept and procedure for integrating the different concepts and approaches to sustainable tourism with a focus on the frequently overlooked link between conventional and sustainable tourism It emphasizes the advancement of sustainable tourism in wildlife tourism at both the attraction and destination levels Based on the theoretical implications the book adds to the existing knowledge of sustainable tourism development by providing a framework for a better understanding and integration of conventional and responsible medical tourism It supports the argument that implementing sustainable development principles is one of the key solutions for reducing or eliminating related impacts from wildlife tourism Moreover this book addresses the unsustainability problem of wildlife tourism by

suggesting the adoption of guiding principles of responsible tourism which are bottom line strategies for the implementation of sustainable wildlife tourism. However, the adoption of sustainable tourism comes with certain expenses and requirements. It may necessitate that the destinations undergo fundamental changes in their existing legal and policy frameworks.

Furthermore, this book has practical and theoretical implications for academics, wildlife and tourism professionals, students, policymakers, and wildlife tourists with or without sufficient background in wildlife tourism, as it initially introduces the readers to the basic concepts of wildlife tourism, responsible tourism, and sustainable tourism. It also explores the various dimensions of traditional wildlife tourism, their impacts, and challenges. *Wildlife Tourism* David Newsome, Ross K.

Dowling, Susan A. Moore, 2005-07-22. This book is a landmark contribution to the rapidly growing field of wildlife tourism, especially in regard to its underpinning foundations of science, conservation, and policy. Written by a number of environmental and biological scientists, it explains the synergy between wildlife and tourism by drawing on their global experiences.

Enhancing Community Involvement in Wildlife Tourism Caroline Ashley, Dilys Roe, 1998 **Wildlife Tourism Futures**

Giovanna Bertella, 2020-11-26. This book presents a series of possible future scenarios in wildlife and animal tourism by combining critical thinking and imagination to stimulate reflection and ways forward. The future of wildlife tourism faces uncertainties that revolve around many factors, including climate change, mass wildlife extinction, human population growth, deforestation, sustainability, and ethical assumptions. For wildlife tourism to meet these challenges, new ways of thinking are necessary. The chapters in this volume focus on future wildlife tourism development and management, the experiential value, educational components, and ethical relevance of tourism, animal encounters, and the technology applied to wildlife tourism. They offer critically imagined futures in order to encourage readers to reflect on the possibility of shaping a better future. The book will appeal to researchers, students, and practitioners in wildlife tourism, environmental studies, sustainability, and conservation. *Wildlife Watching and Tourism* Richard Tapper, 2006. Wildlife watching, tourist activities, can make an important contribution to community development and conservation, especially in developing countries, but it needs to be carefully planned and managed in order to ensure its long-term sustainability and to avoid potential adverse effects on wildlife and local communities. This report, published by UNEP and the Secretariat of the Convention on the Conservation of Migratory Species of Wild Animals (CMS), considers the socio-economic and environmental benefits that can be derived from watching wildlife tourism, including case studies from Brazil, Argentina, and Mexico, the United States, Australia, Indonesia, and Tanzania.

wildlife human interaction which are illustrated in Figure 1 This study focuses on non consumptive wildlife tourism This form of niche tourism includes observing and interacting with animals without harming them with a special interest in wildlife conservation Higginbottom 2004 Duffus Dearden 1990 The future for wildlife tourism is predicted to grow rapidly within the next 10 years A shift away from the single adventurers to a more general target group is forecasted Mintel 2006 leading eventually to mass tourism and more negative impacts The question is where the desire to be close to nature comes from One view is that humans evolved in the natural environment changing in response to it Knopf 1987 Animals have provided much of the food supply for most societies Orams 2002 Furthermore the every day life of the human being demands directed attention and full power There is the desire to be free unconventional and enjoy life Newsome 2005 Furthermore Kim Jamal 2007 introduce that the today s society is inauthentic and isolated driving people to travel in search for an authentic experience This could take the form of staged authenticity making a product out of it Goffman 1963 cited in Kim Jamal 2007 The desire to experience nature is stimulated through the media Orams 2002 In addition a growing concern for the environment visible e g through the Kyoto protocol enhances this phenomenon Mapleweb 2005 Fredrickson Anderson 1999 30 found that a close relationship to animals leads to a decrease in depression and stress enhancing social interaction as the natural experience enables the tourist a step away from the stresses of life
