Wilhelm Meister's Apprenticeship Johann von Goethe,2015-09-24 Wilhelm Meister s Apprenticeship

and Travels Translated from the German of Johann Wolfgang von Goethe By Thomas Carlyle Wilhelm Meister s Apprenticeship German Wilhelm Meisters Lehrjahre is the second novel by Johann Wolfgang von Goethe published in 1795 96 The eponymous hero undergoes a journey of self realization The story centers upon Wilhelm s attempt to escape what he views as the empty life of a bourgeois businessman After a failed romance with the theater Wilhelm commits himself to the mysterious Tower Society These two translations Meister s Apprenticeship and Meister s Travels have long been out of print but never altogether out of demand nay it would seem the originally somewhat moderate demand has gone on increasing and continues to increase They are therefore here republished and the one being in some sort a sequel to the other though in rather unexpected sort they are now printed together The English version of Meister s Travels has been extracted or extricated from a compilation of very various quality named German Romance and placed by the side of the Apprenticeship its forerunner which in the translated as in the original state appeared hitherto as a separate work In the Apprenticeship the first of these translations which was executed some fifteen years ago under questionable auspices I have made many little changes but could not unfortunately change it into a right translation it hung in many places stiff and labored too like some unfortunate buckram cloak round the light harmonious movement of the original and alas still hangs so here and there and may now hang In the second translation Meister s Travels two years later in date I have changed little or nothing I might have added much for the original since that time was as it were taken to pieces by the author himself in his last years and constructed anew and in the final edition of his works appears with multifarious intercalations giving a great expansion both of size and of scope Not pedagogy only and husbandry and art and religion and human conduct in the nineteenth century but geology astronomy cotton spinning metallurgy anatomical lecturing and much else are typically shadowed forth in this second form of the Travels which however continues a fragment like the first significantly pointing on all hands towards infinitude not more complete than the first was or indeed perhaps less so It will well reward the trustful student of Goethe to read this new form of the Travels and see how in that great mind beaming in mildest mellow splendor beaming if also trembling like a great sun on the verge of the horizon near now to its long farewell all these things were illuminated and illustrated but for the mere English reader there are probably in our prior edition of the Travels already novelties enough for us at all events it seemed unadvisable to meddle with it further at present
