## **Your Body Senses:**

*The Body Has a Mind of Its Own* Sandra Blakeslee, Matthew Blakeslee, 2008-09-09 Your body has a mind of its own You know it's true You can sense it even though it may be hard to articulate You know that your body is more than a vehicle for your brain to cruise around in but how deeply are mind and body truly interwoven Answers can be found in the emerging science of body maps Just as road maps represent interconnections across the landscape your many body maps represent all aspects of your bodily self Your self doesn't begin and end with your physical body but extends into the space around you When you drive a car your personal body space grows to envelop it When you play a video game your body maps automatically track and emulate the actions of your character onscreen If your body maps fall out of sync you may have an out of body experience or see auras around other people *The Body Has a Mind of Its Own* explains how you can tap into the power of body maps to do almost anything better play tennis strum a guitar ride a horse dance a waltz empathize with a friend raise children cope with stress Filled with illustrations wonderful anecdotes and even parlor tricks that you can use to reconfigure your body sense *The Body Has a Mind of Its Own* will change the way you think about what it takes to have a conscious mind inside a feeling body Praise for *The Body Has a Mind of Its Own* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST BOOK WORLD You'll never think about your body or your mind in the same way again Daniel Goleman author of *Social Intelligence* A fascinating exploration of senses we didn't even know we had Jon Kabat Zinn author of *Coming to Our Senses* A delightfully original understandable and mind stretching work William Safire columnist *The New York Times Magazine* A marvelous book V S Ramachandran M D director Center for Brain and Cognition University of California San Diego An accessible practical overview of an important scientific story Antonio Damasio author of *Descartes Error* *Destiny Or Fate?* Harry Hone, 2002-06 **Thinking And Destiny** Harold W. Percival, 2002-04 In *Thinking and Destiny* something new although older than time is now made known to the world about Consciousness The information is largely about the makeup of the human where man comes from what becomes of him it explains what thinking is it tells how a thought is created and how thoughts are exteriorized into acts objects and events and how they make his destiny Destiny is thus shown to be self determined by thinking and the process of re-existence and the after death states are told in detail A single reading of any one chapter of *Thinking and Destiny* brings rich rewards in new understanding of life's puzzling mysteries To read the entire book is to come nearer to knowledge of one's destiny and how to shape it than is possible through study of anything previously written in the English language Both the casually curious glancer at books and the most avid seeker for knowledge will be intrigued by the index which lists more than 400 subjects in *Thinking and Destiny* and by the fifteen chapter headings in the Table of Contents which identify the 156 sections The Foreword contains the only pages in which Mr Percival uses the first personal pronoun Here he relates some of the amazing experiences through which he was able to grasp the knowledge he transmits and to acquire the ability to do so **EMDR for Anxiety** Esther

Goldstein,2026-02-01 Eye movement desensitization and reprocessing EMDR is a powerfully effective treatment for anxiety In this innovative book anxiety and EMDR specialist Esther Goldstein outlines mindful self guided skills to desensitize alleviate and in many cases eliminate past present and future experiences of anxiety Readers will learn powerful techniques to soothe stress quickly contain anxiety and reclaim a sense of calm **Body Knowledge System®** Stephanie
