Brian Speer,2015-12-21 A current and cutting edge reference Current Therapy in Avian Medicine and Surgery takes the popular Current Therapy approach in providing succinct and clear information pertinent to the medical care of avian species Most chapters include an up to date delivery of the current state of knowledge on their subject material and provide practical approaches and thought processes applicable to diagnosis and therapy where appropriate Information is always easy to find with topics including the latest advances in internal medicine behavioral medicine anesthesia analgesia and surgery Sections dedicated to welfare conservation and practice risk management explore important but less commonly discussed aspects of avian practice and the pattern recognition portion of the text offers readers a view of what companion bird conditions are likely to be seen in practice in different parts of the world Written by a team of highly regarded contributors from around the world this text helps readers regardless of location and current knowledge develop and augment skills in the medical and surgical care of avian species The Current Therapy format provides current up to date succinct and clear information pertinent to the medical and surgical care of avian species Coverage of clinically significant topics includes current veterinary scientific literature and hot topics relating to today s avian medicine and surgery Coverage of a wide variety of bird species includes psittacines pigeons raptors ratites waterfowl gallinaceous birds and less common species More than 800 full color images show avian disease management strategies and thought processes and aid in formulating guidelines to care World renowned expert contributors provide cutting edge information offering authoritative accurate and sometimes controversial opinions in many areas of study Summary tables simplify the lookup of key facts and treatment guidelines References in each chapter facilitate further reading and research on specific topics *Objectivity* Lorraine Daston,Peter L. Galison,2021-02-02 Objectivity has a history and it is full of surprises In Objectivity Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to

capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically *Narcissism, Nihilism, Simplicity and Self* Karl Markus Abenheimer, 1991 *The Criminal Justice Periodical Index* ,1978
