**Transforming food systems: ethics, innovation and responsibility** Donald Bruce, Ann Bruce, 2023-08-14 Feeding the world's growing population in ways that are effective, ethical, and socially just and protect the natural systems on which all life depends is one of the greatest challenges facing humanity. It forms the theme of this book of papers of the 2022 Edinburgh conference of the European Society for Agricultural and Food Ethics (EURSAFE). The dramatic increases in the cost of energy, scarcities in resources, and people stemming from the COVID-19 pandemic and international conflict have brought home the vulnerability of our interlinked human systems at all levels. Climate change poses deeper, longer-term threats. Global competition drives fine-tuned and efficient systems, but time-proven local practices may show better resilience in such uncertain futures. The book reflects the sheer diversity of approaches and responses to these challenges across a wide range of academic disciplines, provoking us to look at the issues in new ways. They reflect the varied standpoints of producers, retailers, regulators, farmers, vets, communities, and citizens. The challenge to reach net-zero carbon is addressed in papers assessing livestock systems, grasslands, land use, and rewilding. Food choices, meat eating, and alternatives. Innovations such as genome editing, uses of seaweed, and the use of data pose both possibilities and challenges. Animal ethics is a prominent theme, with a range of papers on animal-human relations, animal use in research, and veterinary ethics.

*Wild Animals and Leisure* Neil Carr, Janette Young, 2018-03-05 Wild animals form an integral component of the human leisure experience. They are a significant part of the leisure industry and are economically valuable entities. However, as sentient beings, animals also have rights and welfare needs, and like humans, may also have their own leisure desires and requirements. This collection provides an in-depth analysis of the rights and welfare of humans and wild animals as the two relate to one another within the sphere of leisure studies. It examines a wide array of animals, such as wolves, elephants, dolphins, and apes, in a diverse range of leisure settings in international locations, from captive wild animals in zoos, hunting, swimming with dolphins, and animals used as educators and for tourist entertainment. This book provides a forum for future considerations of wild animals and leisure and a voice for animal-welfarist agendas that seek to improve the conditions under which wild animals interact with and are engaged with by humans.
