Taris,2017-10-02 Occupational health psychology OHP involves the application of psychology to improving the quality of work life and to promoting and protecting the safety health and well being of employees Achieving these aims requires researchers and practitioners to possess in depth knowledge of the processes that are presumed to bring about the desired outcomes To date most studies in OHP have relied on cross sectional designs in examining these processes In such designs all variables of interest are measured simultaneously Although this has generated useful insights in how particular phenomena are associated such designs cannot be trusted when it comes to drawing causal inferences association is not causation This book therefore focuses on longitudinal research designs in OHP whereby the concepts of interest are measured several times offering much stronger evidence for causal relationships The authors focus on design issues in longitudinal research such as the number of measurements chosen and the length of the time lags between these measurements and illustrate these issues in the context of applied research on topics such as the work family interface conflict at work and employee well being By doing so this volume provides a state of the art overview of current research in OHP both in terms of its findings and methodologies This book is based on a special issue of the journal Work Stress

Distant Wanderers Bruce Dorminey,2013-03-09 Recent discoveries of planet like objects circling other sun like stars have stirred enormous interest in what other planets may exist in the universe and whether they support intelligent life or at least could do so This book will take us into the thick of this search for extrasolar planets Unlike other books it will focus on the people behind the searches many of whom the author knows and the extraordinary technology that is on the drawing boards and currently in use to detect distant wanderers and describe their characteristics thus bringing us to the cutting edge of knowledge of the subject The author is an experienced award winning science journalist who was technology correspondent for the Financial Times of London and is now working as a journalist in France He has written on many topics in astronomy and astrobiology and has had pieces published in over 35 different newspapers and magazines worldwide **Engineering and Mining Journal** ,1930 **Annual Report** Canada-France-Hawaii Telescope Corporation,1987 **The Engineering Record, Building Record and the Sanitary Engineer** ,1908 **Bulletin of the University of Wisconsin** ,1909
