Spirally Anisotropic Composites Garry Efimovich Freger, V. N. Kestelman, Dmitry Garrievich Freger, 2013-03-09 It is known that composites have insufficient transversal strength and rigidity and low longitudinal shear modulus compression and shear strength This book describes methods to avoid these disadvantages by hybridization and spiral reinforcement of composites at the micro level during the production stage Mathematical models and design methods have been developed for various composites The authors discuss the technology of spiral reinforcement and fillers the structures and properties of spirally reinforced composites binders the manufacture of such composites and the application of new materials and constructions This informative text will be of interest to researchers teachers and students in academia and also to industrial scientists and engineers involved in the development and application of new materials Spirally Anisotropic Composites Garry Efimovich Freger, V N Kestelman, Dmitry Garrievich Freger, 2014-01-15 Engineered Materials Abstracts, 1994-04

Electromagnetic Composites Handbook, Second Edition Rick Moore, 2016-04-18 Theoretical computational and experimental electromagnetic modeling and characterization This engineering and scientific handbook offers extensive coverage of electromagnetic modeling and characterization of composite materials from the theoretical computational and experimental points of view You will get unique data for non conducting dielectrics semiconducting conducting and magnetic materials and composites composed of two or more molecularly distinct compounds The goal of the book is to contribute to current and visionary electromagnetic composite applications and extend the existing database for composites Electromagnetic Composites Handbook Models Measurement and Characterization is presented in a clear hierarchical style progressing from basic concepts through simple and more complex models and finally to data verifying the models Provides a large collection of tabulated data for more than 300 complex composite materials Information presented will aid in the development of multifunctional material designs The data is a direct extension from Arthur Von Hippel s landmark Dielectric Materials and Application Cleaning and Sanitizing of Spiral-wound Polysulfone Ultrafiltration Membranes Karen Elaine Smith, 1990 Composites Industry Abstracts, 1996 Highly Anisotropic Crystals E.I. Givargizov, 1987 Anisotropy i e the dependence of structure and properties on direction in space is the most striking characteristic of crystals Anisotropy is a result of the discrete nature of the crystal lattice and it is the characteristic which distinguishes the crystalline state from another solid state of matter the amorphous The anisotropy of the structure and properties of crystals this can be called their internal anisotropy is also reflected in their external structure i e morphology The reflection is however non linear properties such as mechanical hardness do not change strongly typically several tens of percents depending on direction while the morphology the linear sizes in different directions of individual crystals often differ by several multiples or even several orders of magnitude depending on the symmetry of the crystalline lattice and or of the crystal prehistory The enhanced anisotropy of morphology is as a rule a result of growth kinetics of different crystalline faces it reflects a non linear character

of the kinetic laws of growth This book is devoted to high morphological anisotropy No strict classification of highly anisotropic crystals exists However some typical forms or habits can be singled out first whiskers or needles or fibers as quasi one dimensional crystals and second platelets as quasi two dimensional crystals **Composites '86** Kōzō Kawada,Sokichi Umekawa,Akira Kobayashi,1986 **International Aerospace Abstracts** ,1999 **Transdex Index** ,1991 An index to translations issued by the United States Joint Publications Research Service JPRS **Mekhanika kompozitnykh materialov** ,1990 **Proceedings** ,2001 Plant Response as a Means of Physiological Investigation Jagadis Chandra Bose,1906 **Developments in X-ray Tomography** ,2006 Conference proceedings ,2000 *Eighth International Conference on mechanics of composite Materials : abstracts* ,1993 A Collection of Technical Papers ,1984 **AIAA Journal** American Institute of Aeronautics and Astronautics,2008 Proceedings of the First (1990) Pacific/Asia Offshore Mechanics Symposium Yukio Ueda,Sae-Wook Oh,Rae Woong Chang,1990 Textile Technology Digest ,1989
