**Guide to Web Development with Java** Tim Downey, 2021-04-12. This comprehensive Guide to Web Development with Java introduces the readers to the three-tiered Model View Controller architecture by using Spring JPA, JSPs, and Spring MVC controllers. These three technologies use Java so that a student with a background in programming will be able to master them with ease, with the end result of being able to create web applications that use MVC to validate user input and save data to a database. Topics and features: Presents web development topics in an accessible, easy-to-follow style, focusing on core information first and allowing the reader to gain basic understanding before moving forwards. Contains many helpful pedagogical tools for students and lecturers, such as questions and exercises at the end of each chapter, detailed illustrations, chapter summaries, and a glossary. Uses existing powerful technologies that are freely available on the web to speed up web development, such as Spring Boot, Spring MVC, Spring JPA, Hibernate, JSP, JSTL, and Java 1.8. Discusses HTML forms and Cascading Style Sheets. Starts with the simplest technology for web development, JSP, and gradually introduces the reader to more complex topics. Introduces core technologies from the outset, such as the Model View Controller architecture. Includes examples for accessing

common web services Provides supplementary examples and tutorials
