web design your wind turbine blades using our software. Match blades to your existing generator's rpm and power output. Customize the blade radius, number, and tsr to find power output for your average wind speed. Purchase plans for turbine blades after your design is complete.

tip speed ratio wikipedia - Feb 26 2022

web the tip speed ratio λ or tsr for wind turbines is the ratio between the tangential speed of the tip of a blade and the actual speed of the wind. The tip speed ratio is related to efficiency, with the optimum varying with blade design. Higher tip speeds

result in higher noise levels and require stronger blades due to larger centrifugal forces the tip speed
