Summer River:

Summer River Rick Kantola, 2011-03-01 The fictional Summer River flows through the remote southeast corner of Summer County in Northern California. In addition to an illegal commune assembled on a mining claim on the river, the region is home to an aging cattle rancher, an aspiring wine grape grower, a marijuana grower, and an elder of the New Life Assembly with a spirited teenaged daughter. Still suffering the pain and anger of a broken marriage, Karen Mitchell moves with her five-year-old daughter into a friend's cabin on the south bank of the river. Rick Kantola is a wonderful writer. Great descriptive powers, pleasing line and paragraph rhythms, and a wonderful ear for dialogue. Todd Walton, author *Inside Moves* and *Ruby and Spear*, a gifted writer with a strong moral angle, a capacity for creating memorable characters, and a deep and lovely sense of landscape. Tim Farrington, author *The California Book of the Dead*. A.B. Brown *Generating Station Units 2-4, Permits*, 1981

Global Warming and Human - Nature Dimension in Northern Eurasia Tetsuya Hiyama, Hiroki Takakura, 2017-08-14 This book describes the current environmental changes due to global warming in northern Eurasia, especially focusing on eastern Siberia. Spring flooding, ice jam movements, and monitoring using remote sensing are included. Additionally, current reindeer herding of indigenous peoples in Siberia and related environmental changes such as waterlogging, rising temperatures, and vegetation changes are addressed. As a summary, the book also introduces readers to adaptation strategies at several governmental levels. The book primarily focuses on 1) introducing readers to global warming and human-nature dynamics in Siberia with special emphasis on humidification of the region in the mid-2000s and 2) describing social adaptation to the changing terrestrial ecosystem with an emphasis on water environments. Adaptation strategies based on vulnerability assessments of environmental changes in northern Eurasia are crucial topics for intergovernmental organizations such as the IPCC Intergovernmental Panel on Climate Change. Thus, the book offers a valuable resource not only for environmental researchers but also for several stakeholders regarding global environmental change.

The Songs of Chu Yuan Qu, 2017-07-18 Sources show Qu Yuan (340-278 BCE) was the first person in China to become famous for his poetry, so famous in fact that the Chinese celebrate his life with a national holiday called Poet's Day or the Dragon Boat Festival. His work, which forms the core of *The Songs of Chu*, the second oldest anthology of Chinese poetry, derives its imagery from shamanistic ritual. Its shamanic hymns are among the most beautiful and mysterious liturgical works in the world. The religious milieu responsible for their imagery supplies the backdrop for his most famous work, *Li Sao*, which translates shamanic longing for a spirit lover into the yearning for an ideal king that is central to the ancient philosophies of China. Qu Yuan was as important to the

development of Chinese literature as Homer was to the development of Western literature This translation attempts to replicate what the work might have meant to those for whom it was originally intended rather than settle for what it was made to mean by those who inherited it It accounts for the new view of the state of Chu that recent discoveries have inspired

Turning with the Tide and Time in the Salish Sea: Change in Estuary and Nearshore Habitats and Species Dependent on Them Correigh M. Greene, Elene Marie Trujillo, Phoebe Gross, Letitia Conway-Cranos, Michael LeMoine, Kathryn Sobocinski, Joshua Chamberlin, Jonathan Moore, Julie S. Barber, 2026-03-26 Intertidal environments of inland seas around the world face numerous threats due to natural sensitivity and cumulative anthropogenic impacts of urbanization and climate change These changes have impacted fish shellfish and other species that use these habitats but have also motivated people to restore intertidal habitats How these habitats and species respond to both impacts and recovery efforts remain issues of international importance The Salish Sea an ecoregion of the northeast Pacific that straddles British Columbia and US Washington State provides key examples of these issues 1 cumulative impacts to intertidal habitats 2 sensitive and threatened species using these systems for rearing as juveniles 3 concerted efforts to restore these habitats and recover species This collection will provide cutting edge analyses of habitat impacts restoration efforts and population responses from multiple areas in the Salish Sea and offer broader lessons for the science and management of intertidal habitats in other regions The goals of this Research Topic are to 1 conceptualize and characterize the anthropogenic change in intertidal environments and the organisms dependent on them 2 evaluate cumulative effects including multiple anthropogenic impacts the effects of restoration actions and climate impacts and 3 highlight creative and cutting edge approaches for studying these questions We are seeking manuscripts featuring new conceptual and analytic approaches methods addressing cumulative effects in intertidal habitats evaluation of large scale restoration benefits on species retrospective analysis of change and evaluations of species responses to changing intertidal conditions Manuscripts should both address change in Salish Sea environments and provide insight into approaches that will be relevant to other regions of the world We are also seeking cross pollination of these studies during the review process contributors should expect to also act as peer reviewers for one manuscript for the Research Topic Please contact any of the editors if you have any additional questions
