Sven Erik Jørgensen

The Global Ecology:

Global Ecology Sven Erik Jørgensen, 2010-04-16 Global Ecology focuses on the perception of the biosphere or the ecosphere as a unified cooperative system with numerous synergistic effects which describe the distinctive properties of this sphere This book is subdivided into five parts dealing with diverse aspects in global ecology The first part of the book provides comprehensive description of the biosphere including its unique characteristics and evolution This part also describes various spheres in the biosphere such as the hydrosphere noosphere and pedosphere as well as their composition The next part focuses on the global cycles including calcium carbon iron microbial nitrogen oxygen phosphorus sulfur and water cycles In addition global balances and flows are explained Presented in the third part are the results of the global cycles and flows as well as the patterns of the climatic factors and marine currents There is also a part discussing the climate interactions climatic changes and its effect on the living organisms The book concludes by covering the application of stoichiometry in the biosphere and in ecosystems The book offers a comprehensive view of global ecology and ecological stoichiometry which will aid in the processes of global ecology Provides an overview of the theory and application of global ecology International focus and range of ecosystems makes Global Ecology an indispensable resource to scientists Based on the bestselling Encyclopedia of Ecology Full color figures and tables support the text and aid in understanding **Global Ecology** Mitchell B. Rambler, 2013-04-25 Public awareness and concern over environmental degradation has reached an all time high as the effect of man s activities on the global environment grows to greater and greater proportions To understand the consequences of these activities it is necessary to understand the fundamental nature of the system that supports life on a planetary scale This book is the first interdisciplinary text on global ecology and is readable to students with only one to two years of science background It contains a glossary of specialized terms which will enable students who are traditionally trained in geology astronomy and chemistry to understand the ecological topics presented It places biogeochemical cycles within a planetary perspective and ties satellite technology and applications to the earth sciences As such it can be the basis for new courses in planetary ecology as well as being useful for present day ecology courses and seminars in environmental science **Global Ecology in Human Perspective** Charles H. Southwick, 1996 A textbook covering the study of human ecology and global ecology ecological principles relevant to global concerns the meaning of global change human impact on the environment population growth and regulation world health interactions of economics and ecology and prospects of human future The central theme of the book deals with the ways humans are altering the earth and how in turn these changes affect human life **The Global Ecology** Edward Moran, 1999 A reference guide to global ecology featuring reprints of articles book excerpts speeches and studies that provide background information and discussion of the issue from various perspectives Includes a bibliography Global Ecology Mikhail Ivanovich Budyko, 1980 Global Ecology Vaclav Smil, 2003-09-02 The magnitude and rapidity of global environmental change threatens the perpetuation of life on Earth

Many aspects of this crisis are familiar to us the destruction of tropical rainforests the hole in the Antarctic ozone desertification soil erosion yet we avoid the underlying challenge of a rapidly deteriorating ecological system and the breadth and complexity of responses demanded Integrating an analysis of both social and environmental needs the book explores the premises and problems of different paths towards global management With its emphasis on flexible response *Global Ecology* furthers our understanding of biospheric change and of our abilities and weaknesses in managing the transition to a sustainable society

The Global Ecology Handbook Study Guide, 1991 *The Global Ecology Handbook* Global Tomorrow Coalition, 1990 A comprehensive easy to use and practical guide on the environment and the linkages among economic development energy policy population growth and other issues as well as what we can do in our daily life to help solve today's environmental problems and improve the quality of life for everyone Includes chapters on tropical rain forests the garbage glut oceans and coasts global warming population growth agriculture biological diversity fresh water hazardous waste environment and development

Global Ecology John P. Holdren, Paul R. Ehrlich, 1971 Elements of an ecological revolution Resource realities Environmental roulette Threatened species technological circuses and other scandals Psycho social complications Prospects for a sane economics Toward a population policy What we must do and the cost of failure

Global Ecology Colin Tudge, 1991 Concern for the environment brought about by the impact of widespread waste pollution and mismanagement has created a pressing need for information about the countless ways that humans animals and plants interact in the world around us In *Global Ecology* eminent science writer Colin Tudge offers an authoritative exploration of ecological science for general readers Illustrated with many full color photographs and drawings and written in an clear easy to read style the book is a fascinating overview of the study of living things and their interactions with the environment and each other This body of knowledge encompasses a wide range of topics animal behavior and plant life evolution physiology climatology population balance species extinction and the impact of human civilization This discussion involves many of today's most talked about issues including the origin of life cleaning up the world's waterways saving the coral reefs and tropical rainforests atmospheric pollution food chains and agricultural development and strategies for the future The book also describes the many diverse terrains climates and habitats where life occurs on our planet while emphasizing the global unity of the Earth's ecosystem Readers will gain a new appreciation for the delicate interplay of the diverse worlds of people plants and animals and their vital dependence on shared environments and resources Written to accompany the Ecology exhibition at London's Natural History Museum the book represents an ideal opportunity for all readers to become acquainted with the findings and ideas of perhaps the most crucial scientific knowledge of our time

Global Ecology Wolfgang Sachs, 1993 Behind the public's hope of effective action by governments on environmental issues lies a complex terrain of conceptual confusion conflicts of interest and philosophical dispute This is why some of the world's leading environmental thinkers have come together in this volume to probe critically the new language being

developed by environmental professionals They examine the contradictions inherent in the fashionable notion of sustainable development They explore the emerging conflicts over the distribution of environmental risks between North and South And they warn that global ecology seen in a managerial perspective may degenerate into an effort to redesign and manage Nature in order to keep economic growth going in the face of a rising tide of resource plunder and pollution This book seeks to launch a critical debate in order to clarify the issues involved and what might constitute appropriate action *Global Ecology* Sven Erik Jørgensen, Brian D. Fath, 2010 Covers key topics in Global Ecology such as Atmospheric impacts on the Biosphere energy carbon and climate change **The Global Ecology Handbook** Walter Harris Corson, 1990 **Inventing Global Ecology** Michael L. Lewis, 2004 Table of contents *Global Ecology* Wolfgang Sachs, 1993-10-01 **Tomorrow Will be Too Late** Rolf Edberg, Aleksei Vladimirovich Iablokov, 1991 A dialogue between Swedish statesman Rolf Edberg and Soviet biologist Alexei Yablokov both environmental activists addresses problems facing mankind on the eve of a new millennium **The Global Politics of the Environment** Lorraine Elliott, 2004-08 Human activity is changing the global environment on a scale unlike that of any other era Environmental deterioration is now a global issue ecologically politically and economically that requires global solutions Yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem What kinds of international institutions are best suited to dealing with global environmental problems Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The *Global Politics of the Environment* makes sense of the often seemingly irreconcilable answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet **Global Studies Encyclopedic Dictionary** Alexander N. Chumakov, Ivan I Mazour, William C. Gay, 2014-07-01 This book provides brief expositions of the central concepts in the field of Global Studies Former President of the Soviet Union Mikhail Gorbachev says The book is intelligent rich in content and I believe necessary in our complex turbulent and fragile world 300 authors from 50 countries contributed 450 entries The contributors include scholars researchers and professionals in social natural and technological sciences They cover globalization problems within ecology business economics politics culture and law This interdisciplinary collection provides a basis for understanding the concepts and methods within global studies and for accessing lengthier and more technical research in the field The articles treat such important topics as the biosphere ozone depletion land resources and pollution world health challenges education global modeling sustainable development war weapons of mass destruction and terrorism The book also promotes academic cooperation political dialogue and mutual understanding across diverse traditions and national identities that are needed to engage successfully the many daunting challenges of globalization

International Environmental Law and the Global South Shawkat Alam, Sumudu Atapattu, Carmen G. Gonzalez, Jona Razzaque, 2015-09-17 The unprecedented degradation of the planet's vital ecosystems is among the most pressing issues confronting the international community. Despite the proliferation of legal instruments to combat environmental problems, conflicts between rich and poor nations, the North-South divide, have compromised international environmental law, leading to deadlocks in environmental treaty negotiations and noncompliance with existing agreements. This volume examines both the historical origins of the North-South divide in European colonialism as well as its contemporary manifestations in a range of issues including food justice, energy justice, indigenous rights, trade, investment, extractive industries, human rights, land grabs, hazardous waste, and climate change. Born out of the recognition that global inequality and profligate consumerism present threats to a sustainable planet, this book makes a unique contribution to international environmental law by emphasizing the priorities and perspectives of the global South. *Global Ecology* Sloggett, 1996-03-01
