**Modelling Survival Data in Medical Research, Second Edition** David Collett, 2003-03-28 Critically acclaimed and resoundingly popular in its first edition *Modelling Survival Data in Medical Research* has been thoroughly revised and updated to reflect the many developments and advances particularly in software made in the field over the last 10 years Now more than ever it provides an outstanding text for upper level and graduate courses in survival analysis biostatistics and time to event analysis The treatment begins with an introduction to survival analysis and a description of four studies that lead to survival data Subsequent chapters then use those data sets and others to illustrate the various analytical techniques applicable to such data including the Cox regression model the Weibull proportional hazards model and others This edition features a more detailed treatment of topics such as parametric models accelerated failure time models and analysis of interval censored data The author also focuses the software section on the use of SAS summarising the methods used by the software to generate its output and examining that output in detail Profusely illustrated with examples and written in the author's trademark easy to follow style *Modelling Survival Data in Medical Research Second Edition* is a thorough practical guide to survival analysis that reflects current statistical practices Byte, 1977-10 **Synthetic Aperture Radar** John J. Kovaly, 1976 Statistics of Income, **Practical Design of Ships and Other Floating Structures** You-Sheng Wu, Guo-Jun Zhou, Wei-Cheng Cui, 2001-08-22 This proceedings contains the papers presented at The 8th International Symposium on Practical Design of Ships and Other Floating Structures held in China in September 2001 the first PRADS of the 21st Century The overall aim of PRADS symposia is to advance the design of ships and other floating structures as a professional discipline and science by exchanging knowledge and promoting discussion of relevant topics in the fields of naval architecture and marine and offshore engineering In line with the aim in welcoming the new era this Symposium is intended to increase international co operation and give a momentum for the new development of design and production technology of ships and other floating structures for efficiency economy safety and environmental production The main themes of this Symposium are Design Synthesis Production Hydrodynamics Structures and Materials of Ships and Floating Systems Proposals for over 270 papers from 26 countries and regions within the themes were received for PRADS 2001 and about 170 papers were accepted for presentation at the symposium With the high quality of the proposed papers the Local Organising Committee had a difficult task to make a balanced selection and to control the total number of papers for fitting into the allocated time schedule approved by the Standing Committee of PRADS Volume I covers design synthesis production and part of hydrodynamics Volume II contains the rest of hydrodynamics and structures and materials *Cataclysmic Variables and Low-Mass X-Ray Binaries* D.Q. Lamb, J. Patterson, 2012-12-06 Since 1976 a meeting devoted to recent research on cataclysmic variables CV workshop has been held annually somewhere in North America Many of the meetings have been held following a custom older than anyone reading this book in locations with well known recreational potential e.g. Santa

Cruz CA Boulder CO We thought hard about this custom while contemplating the possibility of organizing a meeting in Massachusetts in the middle of winter Nobody wants their meeting to go down in history as the smallest and dullest and it surely be the coldest But on occasion meeting organizers have defied custom and scheduled meetings for less than trendy places and gotten away with it Urbana IL and Rochester NY must be reckoned as examples of this Encouraged by the spatial and temporal proximity of the American Astronomical Society meeting Boston January 9 12 we thought we might get away with it again and so came to organize a meeting for January 12 15 1983 in Cambridge MA There was another reason for a meeting at this time and place we loftily proclaimed in early mailings No one doubts that the CV s are closely related to the low mass X ray binaries LMXB s in which the accreting star is usually or perhaps always more compact than a white dwarf Many of the general characteristics of LMXB s sound pretty familiar to any student of CV s orbital periods in the range 0
