Knowing What To Do Is Not Enough Anne-Greet Keizer, Will Tiemeijer, Mark Bovens, 2019-09-19 This open access book sets out to explain the reasons for the gap between knowing and doing in view of self reliance which is more and more often expected of citizens In today s society people are expected to take responsibility for their own lives and be self reliant This is no easy feat They must be on constant high alert in areas of life such as health work and personal finances and if things threaten to go awry take appropriate action without further ado What does this mean for public policy Policymakers tend to assume that the government only needs to provide people with clear information and that once properly informed they will automatically do the right thing However it is becoming increasingly obvious that things do not work like that Even though people know perfectly well what they ought to do they often behave differently Why is this This book sets out to explain the reasons for the gap between knowing and doing It focuses on the role of non cognitive capacities such as setting goals taking action persevering and coping with setbacks and shows how these capacities are undermined by adverse circumstances By taking the latest psychological insights fully into account this book presents a more realist perspective on self reliance and shows government officials how to design rules and institutions that allow for the natural limitations in people s capacity to act **Who!
