Handbook of Quantitative Science and Technology Research Henk F. Moed, Wolfgang Glänzel, Ulrich Schmoch, 2006-02-23

This handbook offers a state of the art overview of quantitative science and technology research. It focuses on the development and application of indicators derived from data on scientific or scholarly publications and patents. It comprises 34 chapters written by leading specialists in the various sub domains. These chapters deal with theoretical and methodological issues, illustrate applications and highlight their policy context and relevance. Authors present a survey of the research topics they address and show their most recent achievements. The 34 chapters are arranged into 5 parts: Disciplinary Approaches, General Methodology, The Science System, The Technology System, and The Science Technology Interface. The Editor's Introduction provides a further specification of the handbook's scope and of the main topics addressed in its chapters. This handbook aims at four distinct groups of readers: practitioners in the field of science and technology studies, research students in this field, scientists, scholars, and technicians who are interested in a systematic thorough analysis of their activities, policy makers and administrators who wish to be informed about the potentialities and limitations of the various approaches and about their results.

Informetrics Junping Qiu, Rongying Zhao, Siluo Yang, Ke Dong, 2017-04-08

This book provides an accessible introduction to the history, theory, and techniques of informetrics. Divided into 14 chapters, it develops the content system of informetrics from the theory, methods, and applications, systematically analyzes the six basic laws and the theory basis of informetrics, and presents quantitative analysis methods such as citation analysis and computer-aided analysis. It also discusses applications in information resource management, information and library science, science of science, scientific evaluation, and the forecast field. Lastly, it describes a new development in informetrics: webometrics.

Providing a comprehensive overview of the complex issues in today's environment, this book is a valuable resource for all researchers, students, and practitioners in library and information science.

Zone Journals Charles Wright, 1996. Charles Wright called his seventh collection *Zone Journals* to emphasize how the poems draw on time and place as their starting point. But despite the air of immediacy and informality, they are artfully composed, informed as always by Wright's profound sense of subliminal order.

Developments in Management Science in Engineering 2017 Jiuping Xu, 2018-11-23

Management science in engineering (MSE) is playing an increasingly important role in modern society. In particular, the development of efficient and innovative managerial tools has significantly influenced the research progress of management science. As research is vital for the propagation of leading edge methods, journal evaluation and classification are critical for scientists, researchers, engineers, practitioners, and graduate students. This book identifies the main research categories of MSE and evaluates and classifies each MSE journal. It represents the outcome of joint efforts from scientific board members, research fellows, and members of various professional societies. It is ideal for scientists, researchers, practitioners, engineers, graduate students, and upper level undergraduates in engineering management, civil engineering, industrial engineering,
