regional and local levels are important as territories are the collecting agents guaranteeing and promoting processes of supra individual utility for example environment quality or social cohesion These institutions are responsible for the important role of outlining specific development policies for communities and the sustainable paths to be undertaken with the aim of increasing the effective well being of individuals Following these assumptions and on the basis of recent developments in the academic literature this edited book debates extensively on these topics offering an updated theoretical ground and pragmatic examples delineating an operational and coordinated evaluation of well being that integrates the economic dimension with the environmental and social ones thus assuring a more complete interpretation of complex local development paths
