**State and Institution Building in Ukraine** Taras Kuzio, Paul J. D'Anieri, Robert S. Kravchuk, 1999 This is a study of state building in Ukraine The author argues that a market economy and democracy cannot exist in the absence of a state and institutions Ukraine was a quasi state within the former USSR when it became independent in January 1992 and thus it inherited only the rudiments of what is traditionally considered a modern state The creation of a state with viable institutions was prioritized by the executive and legislature who understood that a democracy civil society the rule of law and a market economy could not be created in the absence of a state This study surveys institution and state building in Ukraine by placing it within a comparative and theoretical perspective challenging many of the current misconceptions commonly held about Ukraine and other post Soviet countries in the throes of their transformation projects *Institution Building in Weak States* Andrew Radin, 2020-07-01 The effort to improve state institutions in post conflict societies is a complicated business Even when foreign intervention is carried out with the best of intentions and the greatest resources it often fails What can account for this failure In *Institution Building in Weak States* Andrew Radin argues that the international community's approach to building state institutions needs its own reform This innovative book proposes a new strategy rooted in a rigorous analysis of recent missions In contrast to the common strategy of foreign interveners imposing models drawn from Western countries Radin shows how pursuing incremental change that accommodates local political interests is more likely to produce effective accountable and law abiding institutions Drawing on extensive field research and original interviews Radin examines efforts to reform the central government military and police in post conflict Bosnia and Herzegovina Kosovo Iraq and Timor Leste Based on his own experience in defense reform in Ukraine after 2014 Radin also draws parallels with efforts to improve state institutions outside of post conflict societies *Institution Building in Weak States* introduces a domestic opposition theory that better explains why institution building fails and what is required to make it work With actionable recommendations for smarter policy the book offers an important corrective for scholars and practitioners of post conflict missions international development peacebuilding and security cooperation *Post-Communist Ukraine* Bohdan Harasymiw, 2002-02-20 Analysis of successes of Ukraine and its more frequent failures during its transition from authoritarianism to democracy

**The University and the Global Knowledge Society** David John Frank,John W. Meyer,2020-05-19 This book examines the core changes in the nature status and significance of the university over the last century Having grown in numbers reach and scope the university has seen sweeping expansion and has become central in a contemporary global society built on liberal and neoliberal institutions David Frank and John Meyer begin by describing the university s expansion focusing especially on global diffusion They then examine the transformation of university knowledge illustrating the ways in which standardized and scientific knowledge now reaches into more sectors of everyday life This leads them to discuss the porous interface between the university and society They suggest that there are now essentially no social problems that the university should not responsibly address The result is a society dependent on credentials and cultural content provided by the university and in the final chapter of the book the authors reflect on what it means to exist in this knowledge society
