Greenhouse Systems, 1994 *Strategic and System Thinking. Practice of a Strategy* Sixbert Sangwa, 2021-06-08 Academic Paper from the year 2017 in the subject Business economics Miscellaneous grade 80 University of South Wales Business School course Strategic Systems Thinking Tools and Techniques language English abstract This essay serves as a critical appraisal of the statement Systems thinking essentially seeks to understand phenomena as a whole formed by the interaction of parts in relation to changing ideas of strategic thinking It explains how this statement exists within the author's business approach to strategic management The key themes addressed consist of an analysis of approaches to strategic thinking systems thinking complexity perspective especially the new ways of thinking about strategy complex adaptive systems especially Modelling Complexity and The Practice Perspective Today's business environment is complex dynamic multi faceted and the environment has a far reaching impact As for other organizations the author's company's environment is a combination of several factors that surround and affect it Therefore the management of such environment requires managers to carry out a careful analysis of the entire environment to have a clear understanding on how to position the firm in the industry based on fitting the strategy to the current business environment The implication is that business managers should scan both the internal and external environment to adopt develop strategies that they think will make their businesses successful One of the biggest breakthroughs in how we understand and guide change in our organizations is systems theory and systems thinking System thinking and strategic thinking are two interrelated terms that deal with examining patterns and lead to decision making and the planning for execution at the organizational level To understand how both strategic and system thinking are used in organizations it will be clearly defined what systems are To be able to evaluate strategic system thinking and systems tools in an organization both strategies and systems need to be explicitly defined This will also lead to an analysis of the complexity of organizational system

**Competing Globally Through Customer Value** Michael J. Stahl, Gregory M. Bounds, 1991-03-30. Stahl and Bounds focus on the development of an alternative management model and attempt to explain how American business can compete more effectively in the global marketplace. They stress the importance of focusing on the customer, not the competition, and the need to maximize net customer value: what the customer receives minus what customer sacrifices. As set forth in the 34 articles that constitute the book, companies must in effect shift from a classical view of management activities (planning, organizing, directing, controlling) to one that groups activities around producing systems to better serve the customer.
