Taboo Of Subjectivity:

The Taboo of Subjectivity B. Alan Wallace, 2000 For many scientists the only true religion is science itself Wallace examines scientists long term resistance to spiritual study of consciousness and calls for a new science of religion [The Taboo of Subjectivity](#) B. Alan Wallace, 2004-02-12 This book takes a bold new look at ways of exploring the nature origins and potentials of consciousness within the context of science and religion Alan Wallace draws careful distinctions between four elements of the scientific tradition science itself scientific realism scientific materialism and scientism Arguing that the metaphysical doctrine of scientific materialism has taken on the role of ersatz religion for its adherents he traces its development from its Greek and Judeo Christian origins focusing on the interrelation between the Protestant Reformation and the Scientific Revolution He looks at scientists long term resistance to the firsthand study of consciousness and details the ways in which subjectivity has been deemed taboo within the scientific community In conclusion Wallace draws on William James s idea for a science of religion that would study the nature of religious and in particular contemplative experience In exploring the nature of consciousness this groundbreaking study will help to bridge the chasm between religious belief and scientific knowledge It is essential reading for philosophers and historians of science scholars of religion and anyone interested in the relationship between science and religion *The Taboo of Subjectivity : Towards a New Science of Consciousness* Department of Religious Studies University of California B. Alan Wallace Visiting Lecturer, Santa Barbara, 2000-11-09 This book takes a bold new look at ways of exploring the nature origins and potentials of consciousness within the context of science and religion Alan Wallace draws careful distinctions between four elements of the scientific tradition science itself scientific realism scientific materialism and scientism Arguing that the metaphysical doctrine of scientific materialism has taken on the role of ersatz religion for its adherents he traces its development from its Greek and Judeo Christian origins focusing on the interrelation between the Protestant Reformation and the Scientific Revolution He looks at scientists long term resistance to the firsthand study of consciousness and details the ways in which subjectivity has been deemed taboo within the scientific community In conclusion Wallace draws on William James s idea for a science of religion that would study the nature of religious and in particular contemplative experience In exploring the nature of consciousness this groundbreaking study will help to bridge the chasm between religious belief and scientific knowledge It is essential reading for philosophers and historians of science scholars of religion and anyone interested in the relationship between science and religion **Integral Spirituality** Ken Wilber, 2007-11-13 This cutting edge theory of spirituality for today s global society honors the truths of modern science and postmodern culture while incorporating the wisdom of the great world religions Applying his highly acclaimed integral approach Ken Wilber formulates a theory of spirituality that honors the truths of modernity and postmodernity including the revolutions in science and culture while incorporating the essential insights of the great religions He shows how spirituality today combines the enlightenment of the East which excels

at cultivating higher states of consciousness with the enlightenment of the West which offers developmental and psychodynamic psychology Each contributes key components to a more integral spirituality On the basis of this integral framework a radically new role for the world's religions is proposed Because these religions have such a tremendous influence on the worldview of the majority of the earth's population they are in a privileged position to address some of the biggest conflicts we face By adopting a more integral view the great religions can act as facilitators of human development from magic to mythic to rational to pluralistic to integral and to a global society that honors and includes all the stations of life along the way

Prostitution Research in Context Marlene Spanger, May-Len Skilbrei, 2017-03-16 The starting point for this book is the question of how we research sex for sale and the implications of the choices we make in terms of epistemology and ethics Which dilemmas and ethical aspects need to be taken into account when producing qualitative data within a highly politicised and moral infected realm These two questions are exactly what Spanger and Skilbrei aim to unpack in this unusual interdisciplinary methodology book *Prostitution Research in Context* The book offers contributions from a number of scholars who based on their reflections on their own research practice and the existing knowledge field discuss ongoing methodological issues and challenges representative of international research on sex for sale Some chapters deal explicitly with methodological dilemmas in research others thematise the encounter between prostitution research and general texts on epistemology Other chapters again actively engage with the ethical dilemmas that research on the topic of sex for sale can entail The authors represent different disciplines but share an interest in engaging in reflexive research practices informed by feminism and feminist epistemologies An authoritative contribution to the field this innovative volume will appeal to international scholars and students from across the social sciences and humanities in areas such as sociology anthropology criminology media studies feminist studies human geography and history

The Origin of Subjectivity in Hindu Thought Ethel May Kitch, 1917

Screening Post-1989 China W. Ho, 2015-05-20 This unique book investigates the tug of war between the free market economy and authoritative state regulation in Chinese culture after 1989 Contextualizing close

textual readings of cinematic and television texts both officially sanctioned and independently made Wing Shan Ho illuminates the complex process in which cultural producers and consumers negotiate with both the state and the market in articulating new forms of subjectivity Ho examines the types of Chinese subjects that the state applauds and aggrandizes in contrast to those that it condemns and attempts to eliminate Her focus on the socialist spirit exposes inherent contradictions in the current Chinese project of nation building This comparative study shines a harsh light on these cultural products and on much more the confluence between commerce and politics and popular culture the interaction between state and individuals in popular culture and the complexity of governmentality in an era of globalization The Philosopher's Index, 2008 Vols for 1969 include a section of abstracts

Taboo Don Kulick, Margaret Willson, 2003-09-02 Taboo looks at the ethnographer and sexuality in anthropological fieldwork and considers the many roles that sexuality plays in the anthropological production of knowledge and texts How does the sexual identity that anthropologists have in their home society affect the kind of sexuality they are allowed to express in other cultures How is the anthropologists sexuality perceived by the people with whom he or she does research How common is sexual violence and intimidation in the field and why is its existence virtually unmentioned in anthropology These are but a few of the questions to be confronted exploring from differing perspectives the depth of the influence this tabooed topic has on the entire practice and production of anthropology A long overdue text for all students and lecturers of anthropology many post fieldwork readers will find a resonance of issues they have previously faced or tried to avoid and those who are still to undertake fieldwork will find articles that refer to other kinds of personal and professional experience as well as providing invaluable preparations for coping in the field

Painting in a World Transformed William H. Libaw, 2005-10-31 This book shows how painting since the mid 1800s has reflected Western society s mixed feelings about the transformations in our world produced by science and

technology Neither a chronicle of the development of modern art nor a history of the modern era it instead discusses how artists have represented feelings and ideas about the technological changes of modern times Some artists approach this task with an outward focus representing the world they perceive Others focus inward choosing to represent their personal reactions to that world The author examines both approaches to show how major art movements of the last two centuries are related to the largest ever changes in human knowledge An analysis of 28 works reveals perceptions of technological change as both blessing and curse The result of this analysis is a fresh view of the major artworks of the past century and a half along with intriguing insights into our own attitudes towards our world

Education in a Postfactual World Patrick M Whitehead,2017-12-18 In this book Whitehead argues against the fact minded orientation of education and the practice of science It is not that facts are unhelpful but they have become a substitute for learning learning is now tantamount to fact memorization This change handicaps students by eliminating the possibility of creativity curiosity and critical thinking it handicaps science by limiting the kinds of questions that can be asked and where to look for answers and ultimately puts people out of touch with their experience The problem is fact mindedness Facts are the relics of enlightenment thinking They represent unbiased and unquestionable truth about our universe The more you collect the more you know the more you know the more powerful you are the more powerful you are You get the picture It is a familiar theme from the middle of this past century and has been described by contemporary physicists theoretical biologists continental philosophers humanistic psychologists learner centered teachers among many many others Unfortunately college students are seldom exposed these ideas and have to wait until they reach graduate school before they wonder if their learning experience may have been different The goal is to make those ideas accessible here by translating the cumbersome obscure and turgid expression of these ideas into twenty first century examples that are more applicable and meaningful for undergraduates and the educated public It is argued that judgment must always be applied to matters of fact That is to say the fact is not the end of the story That gravity compels bodies does not substantiate itself it is a way of describing the relationships between bodies Gravity helps us better understand physical relationships but by itself and outside of any meaningful context that fact of gravity is useless

Dialogue ,2005 A journal of Mormon thought Science, Religion, and the Human Experience James D. Proctor,2005-04-21 This collection of essays looks at the relationship between science and religion The book begins from the premise that both science and religion operate in yet seek to reach beyond specific historical political ideological and psychological contexts

Magic, Mystery, and Science Dan Burton,David Grandy,2004 Magic Mystery and Science presents the occult as a third stream of belief as important to the shaping of Western civilization as Greek rationalism or Judeo Christianity The occult seeks explanations in a world that is living and intelligent quite unlike the one supposed by science By taking these beliefs seriously while keeping an eye on science this book aims to capture some of the power of the occult Readers will discover that the occult has a long history that reaches back to Babylonia and ancient Egypt It proceeds

alongside and frequently mingles with religion and science From the Egyptian Book of the Dead to New Age beliefs from Plato to Adolf Hitler occult ways of knowing have been used to explain a world that still tempts us with the knowledge of its dark secrets From publisher s description

Conversations on Empathy Francesca Mezzenzana,Daniela Peluso,2023-01-16 In the aftermath of a global pandemic amidst new and ongoing wars genocide inequality and staggering ecological collapse some in the public and political arena have argued that we are in desperate need of greater empathy be this with our neighbours refugees war victims the vulnerable or disappearing animal and plant species This interdisciplinary volume asks the crucial questions How does a better understanding of empathy contribute if at all to our understanding of others How is it implicated in the ways we perceive understand and constitute others as subjects Conversations on Empathy examines how empathy might be enacted and experienced either as a way to highlight forms of otherness or instead to overcome what might otherwise appear to be irreducible differences It explores the ways in which empathy enables us to understand imagine and create sameness and otherness in our everyday intersubjective encounters focusing on a varied range of radical others others who are perceived as being dramatically different from oneself With a focus on the importance of empathy to understand difference the book contends that the role of empathy is critical now more than ever for thinking about local and global challenges of interconnectedness care and justice

Critical Subjectivities Victoria Best,2000 This comparative study of the work of Colette and Marguerite Duras analyses the complex and intricate links between identity and narrative and challenges recent theoretical discussion in both literary and psychoanalytic domains
