**Organization and Tactics** Arthur Lockwood Wagner, 1895 *Antietam And Gettysburg: Tactical Success In An Operational Void* Lt.-Cmdr Stephen P. Black USN, 2015-11-06 The Battles of Antietam and Gettysburg are widely recognized as tactical victories for the Union's Army of the Potomac Following both battles however the respective commanding generals General McClellan and General Meade were sharply criticized for having failed to vigorously pursue General Lee and his Army of Northern Virginia in order to deliver a decisive blow Both Union commanders offered a list of extenuating circumstances such as battle fatigue large casualties and lack of supplies which precluded a premature pursuit of General Lee Upon examination however their inability to conceptualize a decisive pursuit of General Lee's army points to a direct failure at the operational level of War Both Union generals were unable to link their tactical victories to any larger strategic objective The reasons for this from the strategic confusion of a conflict evolving from limited War to total War and from the void in operational training that left both McClellan and Meade ill prepared to perform successfully at this critical level of Warfare Examining this operational void it becomes apparent that a commander's construct of War must be complete that is fully cognizant of the strategic operational and tactical levels of War in order to achieve success beyond the limits of the tactical battlefield Such an examination points to the criticality of the operational level of Warfare highlights the importance of the commander's concept of operations and suggests that an operational commander must grow in the sense that his cognitive processes must be tuned into the dynamics of his environment not only on a tactical level but on the operational
