DISCLAIMER: This map was prepared by the Texas Water Development Board using the best available information. Twdb makes no warranty for the accuracy or completeness of the information shown herein nor for the suitability for a particular use. The board disclaims all responsibility for any errors or omissions.

In response to the drought of the 1950s and in recognition of the need to plan for the future, the legislature created the Texas Water Development Board. Through studying water supplies and demands prior to 1960, the board's first major study in 1961, the legislature established a new water planning process, based on a "bottom-up," consensus-driven approach. Distributing this water planning process into 11 planning groups, one for each regional water planning area (see map), the planning groups, each made up of about 20 members, represent a variety of interests, including agriculture, industry, environment, public, municipalities, business, water districts, rural utilities, water utilities, counties, and power generators.

MISSION: The Texas Water Development Board's (TWDB) mission is to provide leadership, planning, financial assistance, information, and education for the conservation and responsible development of water for Texas.
