Consciousness without the Infinite Regress Guenter Albrecht-Buehler,2023-01-31 Unlike other social animals humans have evolved far too much analytical intelligence to let us naturally agree with each other s actions Nevertheless in the short span of a few million years we have become the most effectively cooperative species on the planet and this book argues that this is owing to our consciousness So far consciousness has stubbornly defeated our attempts to explain it as a product of non mental elements The ultimate reason for this failure is that we are conscious of being conscious As a result all non mental based explanations lead to endless chains of infinite regress Therefore this book proposes to drop the requirement of non mental elements as explanations of consciousness for the time being and instead base our explanations on elements that are already borderline conscious Be they prime single or compound all qualia form with lightning speed in our mind and are always experienced as singular unique and personal They play for our mind the same role that hashes short standardized unambiguous and unique tokens of immensely large and complex originals play for our modern information technology Therefore using concepts derived from Arthur Schopenhauer Bertrand Russell Glaucoma Hash functions SHA 2 and the logical connective XOR exclusive OR this book defines consciousness as a super compound quale which combines all compound qualia that are present at every moment in everyone s mind **Rogue Watcher: Book 2 of the Second Moon Trilogy** Jon Fischer,2023-12-07 Earth is not the only planet with intelligent human life For many millennia advanced humans from Completed Worlds have monitored the technological development of humans on other less advanced planets across the universe including Earth Each Developing World always has five Watchers from Completed Worlds who are assigned to live

on the planet and monitor its progress The Watchers work under the strict direction of a Universal MAXIM to anonymously observe and report and never interfere with the native humans Earth was Developing at a great pace until a band of Universal terrorists known as Takers damaged the Earth with large asteroids flooding the planet and killing nearly all its population The largest asteroid in the attack was miraculously caught into the Earth s orbit becoming a second moon Rogue Watcher the next installment of the Second Moon Trilogy picks up where Alpine Tide left off The stakes are higher than ever as eighteen year old Miriam Madsen and her fellow survivors face new threats from across the Universe To avoid their certain destruction Watcher 3 of Earth known locally as Spence will stop at no length to protect Miriam the woman he loves even if it means going rogue Explore the Second Moon Trilogy online at [www secondmoontrilogy com](http://www.secondmoontrilogy.com) for exclusive content author commentary and a sneak peek into the last installment of the trilogy

Dreamworld and Catastrophe Susan Buck-Morss,2002 This study develops the notion of dreamworld as both a poetic description of a collective mental state and an analytical concept Stressing the similarities between East West the book examines extremes of mass utopia dreamworld and catastrophe

Toward a New Definition of Health P. I. Ahmed,2012-12-06 It is generally recognized today that the United States has a need to contribute to the improvement of health throughout the world The need stems from the interrelationships that exist between the health of Americans and the health status of the rest of the people on Spaceship Earth Disease does not respect national boundaries and the frequency of travel and trade between countries increases each year It further relates to the opportunities found in international settings to help solve health problems more effectively and efficiently This includes the unique human resources that are found throughout the world as well as certain natural ecological conditions that cannot be duplicated in the United States The United States also has a responsibility to contribute to improved health status Our tradition of humanitarianism alone supports such a responsibility but our comparative wealth of technical and financial resources dictates a requirement to participate Modern political realities define relationships between developed and developing countries that will not allow us to isolate ourselves from the compelling health needs of a majority of the world s population
