## The Building Site:

**Paestum. From building site to temple** Gabriel Zuchtriegel, 2021-02-09T00:00:00+01:00 There were numerous divine dwellings at Paestum just as there were in other Greek cities around the Mediterranean The Temple of Neptune is simply the most well preserved example Next to it stands the Basilica the oldest of the three great Doric buildings at Paestum c 560 520 BC Further north beyond the Roman forum which stands on the area previously occupied by the ancient agora a marketplace and a square where assemblies and other meetings were held in the Greek period a small hill is crowned by the temple of Athena the only one for which the identity of the deity worshipped there is definitely known Gabriel Zuchtriegel A masterful rigorous and accessible guide updated to the latest archaeological discoveries of the best preserved and enhanced archaeological site of Magna Graecia On the Formation of the Upper Monastic Area of Seon Buddhist Temples from Korea's Late Silla to the Goryeo Era Lee Seung-yeon, 2013-07-16 When Seon Zen Buddhism was first introduced to Korea around Korea's late Silla and early Goryeo eras the function of the beopdang Dharma hall was transfused to the lecture hall found in ancient Buddhist temples establishing a pivotal area within the temple compound called the upper monastic area By exploring the structural formation and dissolution of the upper monastic area the author shows how Korea established its own distinctive Seon temples unlike those of China and Japan in the course of assimilating a newly introduced foreign culture as its own To accomplish this the author analyzed the inscriptions on stone monuments which recorded the lives of eminent monks and also numerous excavated temple ruins These analyses give us a new perspective on the evolution of the upper monastic area which had the beopdang as its center at a time when early Seon temples were being established under very adverse and unstable circumstances The exploration of the spatial organization and layout of Korean Seon temple architecture has illuminated the continuity between Korean Buddhist temples of both the ancient and medieval eras **FCS**
