Tomorrow's Guardian Richard Denning, 2010-11 Tom Oakley experiences disturbing episodes of déjà vu and believes he is going mad. Then he discovers that he is a Walker, someone who can transport himself to other times and places. Tom dreams about other Walkers in moments of mortal danger: Edward Dyson, killed in a battle in 1879; Mary Brown, who perished in the Great Fire of London; and Charlie Hawker, a sailor who drowned on a U-boat in 1943. Agreeing to travel back in time and rescue them, Tom has three dangerous adventures before returning to the present day. But Tom's troubles have only just begun. He finds that he is drawn the attention of evil individuals who seek to bend history to their will. Soon Tom's family are obliterated from existence, and Tom must make a choice between saving them and saving his entire world. *Tomorrow's Guardian* is a Young Adult Fantasy Novel.

Planet Health Jill Carter, 2007 The second edition of *Planet Health: An Interdisciplinary Curriculum for Teaching Middle School Nutrition and Physical Activity* offers an innovative approach to teaching health education. You can use this proven, evidence-based curriculum to teach students about nutrition and physical activity while helping them build skills and competencies in language arts, math, science, social studies, and physical education. The curriculum is designed for use by teachers in core academic areas as well as in physical education and health. This new edition includes revised nutrition and physical activity information, ensuring that you're equipped with the most up-to-date science. The book also includes an all-new CD-ROM with plenty of reproducible worksheets, parent information, and newsletters, school health resources, and other teacher resource materials. Like the popular first edition, *Planet Health* provides 35 complete, ready-to-use lesson plans and 31 microunits that promote healthy nutrition and activity materials and instructions to implement *Power Down*, a two-week campaign to reduce television and other media viewing time, which you can launch in the classroom or school-wide, and *FitCheck*, a self-assessment tool to help students track and improve their activity levels. In addition, the book includes access to a Web site which features a teacher training PowerPoint presentation, a *Planet Health* FAQ, and more. *Planet Health: Second Edition* encourages students to think holistically about how health behaviors are interrelated, and it offers a constructivist approach to teaching and learning. With this approach, you can build on your students' knowledge and experiences to create an active, inquiry-based, student-centered learning environment, one in which students learn best as they construct meaning for themselves. Developed by educators and scientists at the Harvard School of Public Health, *Planet Health: Second Edition* is aligned with the Massachusetts Department of Education Curriculum Frameworks, learning standards for health, language arts, math, science, and technology, and history and social science, and it meets the standards in many other states. Every *Planet Health* lesson incorporates a range of language arts learning standards and engages students through discussion, ideas for small or large groups in which they cooperatively learn and solve health-related issues. Active discussions are used to encourage higher-level thinking and cognition, and peer group work fosters social development. This new edition of *Planet Health* is the perfect antidote to kids' inactivity, poor food choices, and high levels of screen viewing time.
