of principles can be so instructive as a selection of hands played completely through and accompanied by copious explanations The idea it is believed as applied to whist is a new one though a similar plan has long been in use in treatises on chess It has not been deemed necessary to occupy space by detailing the mode of playing and of scoring as this information can be readily acquired at the table The reader is therefore credited with this elementary knowledge and is conducted at once to the general principles which he is advised to consider carefully before proceeding to the hands
