**Czech (& Central European) Yearbook of Arbitration - Borders of Procedural and Substantive Law in Arbitral Proceedings - 2013** Alexander J. Bělohávek, Filip Cerný, Naděžda Rozehnalova, 2013-03-01 The Czech Yearbooks Project for the moment made up of the Czech Yearbook of International Law and the Czech Central European Yearbook of Arbitration began with the idea to create an open platform for presenting the development of both legal theory and legal practice in Central and Eastern Europe and the approximation thereof to readers worldwide This platform should serve as an open forum for interested scholars writers and prospective students as well as practitioners for the exchange of different approaches to problems being analyzed by authors from different jurisdictions and therefore providing interesting insight into issues being dealt with differently in many different countries The Czech Central European Yearbook of Arbitration the younger twin project within the Czech Yearbooks primarily focuses on the problematic of arbitration from both the national and international perspective The use of arbitration as a method of dispute resolution continues to increase in importance Throughout Central and Eastern Europe arbitration is viewed as being progressive due to its practical aspects and to its meeting the needs of specialists in certain practice areas Central and Eastern Europe the primary but not exclusive focus of this project is steeped in the Roman tradition of continental Europe in which arbitration is based on the autonomy of the parties and on informal procedures This classical approach is somewhat different from the principles on which the system of arbitration in common law countries is based Despite similarities among countries in the region arbitration in Central and Eastern Europe represents a highly particularized and fragmented system One shortcoming in the use of arbitration in Central and Eastern Europe is the absence of comparative standards or a baseline that would facilitate the identification of commonalities and differences in individual countries and help resolve problems that are common throughout the region The CYArb project aims to address this issue and provide a forum for comparisons of arbitration practice and doctrine in countries within the region and in relation to practices internationally It sheds light on both practical and academic aspects within these countries and compares those approaches to broader European and international practices This project will also foster a broad exchange of legal research and other information on the subject The third volume of the CYArb focuses on the
