How can we Co-Create Solutions in Health Promotion with Users and Stakeholders? Ines Keygnaert,Sonia Dias,Christiane Stock,Annika Frahsa,Timo Dietrich,2022-01-24

Teaching Dilemmas and Solutions in Content-Area Literacy, Grades 6-12 Peter Smagorinsky,2014-08-19 Because literacy is not just the English teacher s job Think literacy is just for English teachers Not anymore Nor should it be when you consider that each discipline has its own unique values and means of expression These days it s up to all teachers to communicate what it means to be literate in their disciplines Here finally is a book ambitious enough to tackle the topic across all major subject areas Smagorinsky and his colleagues provide an insider s lens on both the states of their fields and their specific literacy requirements including Reviews of the latest issues and research Scenario based activities for reflection and discussion Considerations of the textual forms and conventions required in all major disciplines

Uncovering the Logic of English: A Common-Sense Solution to America's Literacy Crisis Denise Eide,2011-01-27 English is so illogical It is generally believed that English is a language of exceptions For many learning to spell and read is frustrating For some it is impossible especially for the 29% of Americans who are functionally illiterate But what if the problem is not the language itself but the rules we were taught What if we could see the complexity of English as a powerful tool rather than a hindrance Denise Eide Uncovering the Logic of English challenges the notion that English is illogical by systematically explaining English spelling and answering questions like Why is there a silent final E in have large and house and Why is discussion spelled with sion rather than tion With easy to read examples and anecdotes this book describes the phonograms and spelling rules which explain 98% of English words how English words are formed and how this knowledge can revolutionize vocabulary development how understanding the reasons behind English spelling prevents students from needing to guess The author s inspiring commentary makes a compelling case that understanding the logic of English could transform literacy education and help solve America s literacy crisis Thorough and filled with the latest linguistic and reading research Uncovering the Logic of English demonstrates why this systematic approach should be as foundational to our education as 1 1 2

Practical Solutions to the Future Workforce Needs of Wisconsin ,1990

Presenters at a public hearing testified about strategies that were working and those that were considered not to be working in the Wisconsin vocational education system. The strategies that were cited as working were education provided to businesses by VTAE Vocational Technical Adult Education district colleges, interaction between business and education, collaboration among entities such as the Job Centers, support of organized labor for training, onsite literacy training for workers, high school vocational programs that are becoming updated, cooperation between high school and postsecondary programs, and services to at-risk students. Among those strategies cited as not working to the extent necessary to meet work force needs or factors affecting such strategies were variations in responsiveness by VTAE colleges, employees' lack of basic literacy, problem solving, and interpersonal skills, the need for more agency collaboration, the skilled worker shortage, and the need to train the handicapped and disadvantaged. Discrimination against older workers, effects on high school vocational programs of new graduation and university requirements, the need for workers to function in a global work force, increased demands on schools, and the dropout rate, the need for more career counseling for youth and adults, and the fact that women are clustered in traditionally lower paid jobs. Recommendations included expansion of literacy program efforts with the assistance of additional state funding, implementation of an educational model by the Department of Public Instruction that would provide every student the best opportunity to become functionally literate, and changes in the VTAE policies to enable the VTAE colleges to become more responsive to the changing needs of business and industry and to prepare the system to meet the work force needs of the next century.

The Literacy Crisis Jeff McQuillan, 1998. Presents statistical evidence to support the author's contention that children in the United States are reading at the same or a better level than they did a generation ago and argues that the literacy crisis has been brought on not by poor achievement but by a simple lack of books
