Organic Farming Framework:

Organic Agriculture Development Strategies, 2018 *Re-Thinking Organic Food and Farming in a Changing World*

Bernhard Freyer, Jim Bingen, 2014-10-17 This book is based on the assumption that organic has lost its way. Paradoxically it comes at a time when we witness the continuing of growth in organic food production and markets around the world. Yet the book claims that organic has lost sight of its first or fundamental philosophical principles and ontological assumptions. The collection offers empirically grounded discussions that address the principles and fundamental assumptions of organic farming and marketing practices. The book draws attention to the core principles of organic and offers different clearly articulated and well defined conceptual frameworks that offer new insights into organic practices. Divided into five parts the book presents new perspectives on enduring issues, examines standards and certification, gives insights into much discussed and additional market and consumer issues, and reviews the interplay of organic and conventional farming. The book concludes with a framework for rethinking ethics in the organic movement and reflections on the positioning of organic ethics. *Development Centre Studies Towards Greener and More Inclusive Societies in Southeast Asia* OECD, 2024-03-11

Understanding the effects of both climate change and green growth policies on jobs and people is thus essential for making the transition in Southeast Asia an inclusive one. The study explores these issues with emphasis on the potential effects on labour of an energy transition in Indonesia and of a transition in the region's agricultural sector illustrated by a simulated conversion from conventional to organic rice farming. *Intelligent Technologies for Research and Engineering S.*
