adopted of centralized goal setting decentralized goal attainment decentralized policy making and implementation Xu concludes that this model provides compelling evidence that China's worst environmental years reside in the past This book will be of great interest to students and scholars of Chinese environmental policy and governance air pollution climate change and sustainable development as well as practitioners and policy makers working in these fields The Open Access version of this book available at <https://www.taylorfrancis.com/books/9780429452154> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
