State Of War:

The State, War, and the State of War Kalevi Jaakko Holsti,1996 War has traditionally been studied as a problem deriving from the relations between states Strategic doctrines arms control agreements and the foundation of international organizations such as the United Nations are designed to prevent wars between states Since 1945 however the incidence of interstate war has actually been declining rapidly while the incidence of internal wars has been increasing The author argues that in order to understand this significant change in historical patterns we should jettison many of the analytical devices derived from international relations studies and shift attention to the problems of weak states those states unable to sustain domestic legitimacy and peace This book surveys some of the foundations of state legitimacy and demonstrates why many weak states will be the locales of war in the future Finally the author asks what the United Nations can do about the problems of weak and failed states **Hearings** United States. Parliament,1907 *Criminology and War* Sandra Walklate,Ross McGarry,2015-03-24 It is widely observed that the study of war has been paid limited attention within criminology This is intellectually curious given that acts of war have occurred persistently throughout history and perpetuate criminal acts victimisation and human rights violations on a scale unprecedented with domestic levels of crime However there are authoritative voices within criminology who have been studying war from the borders of the discipline This book contains a selection of criminological authors who have been authoritatively engaged in studying criminology and war Following an introduction that places war within criminology the collection is arranged across three themed sections including Theorising War Law and Crime Linking War and Criminal Justice and War Sexual Violence and Visual Trauma Each chapter takes substantive topics within criminology and victimology i e corporate crime history imprisonment criminal justice sexual violence trauma security and crime control to name but a few and invites the reader to engage in critical discussions relating to wars both past and present The chapters within this collection are theoretically rich empirically diverse and come together to create the first authoritative published collection of original essays specifically dedicated to criminology and war Students and researchers alike interested in war critical criminology and victimology will find this an accessible study companion that centres the disparate criminological attention to war into one comprehensive collection *Annual Reports of the War Department* United States.
