Suicide In Prisons:

Prison Suicide Lindsay M. Hayes, 1998-12 Until recently it has been assumed that suicide although a problem for jail inmates as they face the initial crisis of incarceration is not a significant problem for inmates who advance to prison to serve out their sentences This monograph was produced to fill a critical void in the knowledge base about prison suicide In addition to a through review of the literature and of national and state standards for prevention it offers the most recent national data on the incidence and rate of prison suicide effective prevention programs and discussion of liability issues References appendices and tables

Suicide and Self-Harm in Prisons and Jails Christine Tartaro, David Lester, 2010-07-12 Police and corrections personnel must always be mindful of the possibility that those in their custody may attempt suicide or commit an act of self mutilation Persons housed in prisons jails and police lockups tend to be at a higher risk for such destructive behavior than members of the general population Reasons for this can be found by examining the mental health substance abuse and physical sexual abuse histories of inmates in addition to deficits in their coping skills and the stress and uncertainty generated by incarceration This book explores several topics pertaining to suicide and deliberate self harm in the corrections setting including who tends to commit these acts where when and how these incidents occur screening mechanisms the role of environmental stimuli in facilitating or preventing acts of self harm interpersonal relations among inmates and between inmates and staff and the role of the courts in setting and ruling on suicide prevention policies The authors discuss the role of prevention techniques that offer a balance between strict opportunity reduction and softer motivation reduction strategies The book also includes suggestions for diversion programs that can keep mentally ill inmates out of prisons and jails and transition planning programs to better prepare outgoing inmates for their re entry into the community

Suicides in Prison Alison Liebling, 2002-09-11 The suicide rate in prisons in England and Wales is 40 per 100 000 four times that of the general population How can this be explained Recent prison suicides have aroused much public concern and media attention yet there has been very little research examining their true cause or nature Previous studies have tended to rely exclusively on official statistics and prison records and have had little effect in practice *Suicides in Prison* is the first major study in this area to draw directly on the experiences of both prisoners and staff The interviews conducted by the author help to cast new light on the circumstances which can lead to suicide or attempted suicide The author provides further evidence to support the growing recognition that suicide is not an exclusively psychiatric problem The coping mechanisms and social support given to the people involved can have a crucial role to play Alison Liebling also shows how serious difficulties in the management of prisoners at risk of suicide may be exacerbated by problems of communication between departments and that prison officers may lack the necessary training to play a potentially major role in suicide prevention Most importantly if staff perceptions and attitudes are not addressed any attempt to improve procedures may well be ineffective *Suicides in Prison* traces the recent history of the problem and provides the first major

theoretical discussion of the nature and causes of suicide in prison Suicide in Prisons Graham Towl, David Crighton, 2017-05-03 The definitive guide from two leading authors central to developments in the field An invaluable book which covers everything from theoretical and community research to precisely what is known about prisoners and the risk of their completing suicide Covers the Harris Review and Government Response to it as well as the stance of politicians reform groups and other leading experts on what in 2017 is an escalating problem for UK prisons Contains analysis and data from over 30 years bringing together key knowledge and information at a critical time of concern and attention **Suicide and Self-injury in Prison** Charles Lloyd, 1990 Includes a bibliography **The Prevention of Suicide in Prison** Daniel Pratt, 2015-08-27 Suicide is considered to be the leading cause of preventable death in prisons While there is increasingly expansive literature examining the various risk factors associated with a likelihood of eventual prison suicide so far this has struggled to lead to successful prevention programmes An alternative approach is needed that seeks to understand at the individual level what leads a prisoner to contemplate ending their own life This book describes how the authors developed and delivered evidence based psychological interventions for suicide prevention in prison The authors present a compelling argument for a psychological approach to the prevention of prison suicide drawing upon a cognitive behavioural perspective with chapters investigating two novel psychological therapies Cognitive Behavioural Suicide Prevention and Problem Solving Training The methodology behind each study is presented alongside preliminary findings emerging from the evaluations and detailed case studies are included as exemplars of the process and content of the therapies as well as the individual and contextual challenges to be overcome The book provides timely research into the development of a better understanding of why prisoners engage in suicide behaviour and the preventive interventions showing the most promise for future investigation The Prevention of Suicide in Prison will be critical reading for clinical and forensic psychologists psychological therapists psychiatrists and other mental health staff working within a prison context as well as postgraduates in training and researchers studying suicide in forensic settings **Aperçu sur les finances de la République française** ,1798 *Jail House Blues* Bruce L. Danto, 1973 **Prisoners' Deaths in Local Jails** Lisa Nealy, 2004 Since 1987 there have been 49 inmate deaths in jails and prisons across the state of Mississippi No study has been produced or written to explicate why such deaths have occurred in Mississippi s jails Most of the deaths have been labeled suicide but further research by the author has led to other explanations that these deaths were not all suicide Many of the victims were African American male young and with no previous history of arrests Within 24 hours of being incarcerated many of these pre trial detainees were found hanged in their jail cells with larynx and muscles missing tongue cut out and body covered with bruises Suicide Behind Bars David Lester, Bruce L. Danto, 1993 The Prevention of Suicide in Prison Daniel Pratt, 2015-08-27 Suicide is considered to be the leading cause of preventable death in prisons While there is increasingly expansive literature examining the various risk factors associated with a likelihood of eventual prison suicide so far this has struggled to lead to successful

prevention programmes An alternative approach is needed that seeks to understand at the individual level what leads a prisoner to contemplate ending their own life This book describes how the authors developed and delivered evidence based psychological interventions for suicide prevention in prison The authors present a compelling argument for a psychological approach to the prevention of prison suicide drawing upon a cognitive behavioural perspective with chapters investigating two novel psychological therapies Cognitive Behavioural Suicide Prevention and Problem Solving Training The methodology behind each study is presented alongside preliminary findings emerging from the evaluations and detailed case studies are included as exemplars of the process and content of the therapies as well as the individual and contextual challenges to be overcome The book provides timely research into the development of a better understanding of why prisoners engage in suicide behaviour and the preventive interventions showing the most promise for future investigation The Prevention of Suicide in Prison will be critical reading for clinical and forensic psychologists psychological therapists psychiatrists and other mental health staff working within a prison context as well as postgraduates in training and researchers studying suicide in forensic settings

Report on Suicides in Prison James Hennessy, Great Britain. Her Majesty's Chief Inspector of Prisons for England and Wales, 1984

Suicide: A Global Perspective Maurizio Pompili, 2012-09-19

In the year 2000 approximately one million people died from suicide a global mortality rate of 16 per 100 000 or one death every 40 seconds In the last 45 years suicide rates have increased by 60% worldwide Suicide is now among the three leading causes of death among those aged 15 44 years both sexes these figures do not include suicide attempts up to 20 times more frequent than completed suicide Suicide worldwide is estimated to represent 1.8% of the total global burden of disease in 1998 and 2.4% in countries with market and former socialist economies in 2020 Although traditionally suicide rates have been highest among the male elderly rates among young people have been increasing to such an extent that they are now the group at highest risk in a third of countries in both developed and developing countries Mental disorders particularly depression and substance abuse are associated with more than 90% of all cases of suicide however suicide results from many complex sociocultural factors and is more likely to occur particularly during periods of socioeconomic family and individual crisis situations e.g. loss of a loved one employment honour The economic costs associated with completed and attempted suicide are estimated to be in the billions of dollars One million lives lost each year are more than those lost from wars and murder annually in the world It is three times the catastrophic loss of life in the tsunami disaster in Asia in 2005 Every day of the year the number of suicides is equivalent to the number of lives lost in the attack on the World Trade Center Twin Towers on 9/11 in 2001 Everyone should be aware of the warning signs for suicide Someone threatening to hurt or kill him/herself or taking of wanting to hurt or kill him/herself someone looking for ways to kill him/herself by seeking access to firearms available pills or other means someone talking or writing about death dying or suicide when these actions are out of the ordinary for the person Also high risk of suicide is generally associated with hopelessness rage uncontrolled anger seeking

revenge acting reckless or engaging in risky activities seemingly without thinking feeling trapped like there s no way out increased alcohol or drug use withdrawing from friends family and society anxiety agitation unable to sleep or sleeping all the time dramatic mood changes no reason for living no sense of purpose in life Table 1 Understanding and helping the suicidal individual should be a task for all Suicide Myths How to Help the Suicidal Person Warning Signs of Suicide Myth Suicidal people just want to die Fact Most of the time suicidal people are torn between wanting to die and wanting to live Most suicidal individuals don t want death they just want to stoop the great psychological or emotional pain they are experiencing Listen Accept the person s feelings as they are Do not be afraid to talk about suicide directly Ask them if they developed a plan of suicide Expressing suicidal feelings or bringing up the topic of suicide Giving away prized possessions settling affairs making out a will Signs of depression loss of pleasure sad mood alterations in sleeping eating patterns feelings of hopelessness Myth People who commit suicide do not warn others Fact Eight out of every 10 people who kill themselves give definite clues to their intentions They leave numerous clues and warnings to others although clues may be non verbal or difficult to detect Remove lethal means for suicide from person s home Remind the person that depressed feelings do change with time Point out when death is chosen it is irreversible Change of behavior poor work or school performance Risk taking behaviors Increased use of alcohol or drugs Social isolation Developing a specific plan for suicide Myth People who talk about suicide are only trying to get attention They won t really do it Fact Few commit suicide without first letting someone know how they feel Those who are considering suicide give clues and warnings as a cry for help Over 70% who do threaten to commit suicide either make an attempt or complete the act Express your concern for the person Develop a plan for help with the person Seek outside emergency intervention at a hospital mental health clinic or call a suicide prevention center Myth Don t mention suicide to someone who s showing signs of depression It will plant the idea in their minds and they will act on it Fact Many depressed people have already considered suicide as an option Discussing it openly helps the suicidal person sort through the problems and generally provides a sense of relief and understanding Suicide is preventable Most suicidal individuals desperately want to live they are just unable to see alternatives to their problems Most suicidal individuals give definite warnings of their suicidal intentions but others are either unaware of the significance of these warnings or do not know how to respond to them Talking about suicide does not cause someone to be suicidal on the contrary the individual feel relief and has the opportunity to experience an empathic contact Suicide profoundly affects individuals families workplaces neighbourhoods and societies The economic costs associated with suicide and self inflicted injuries are estimated to be in the billions of dollars Surviving family members not only suffer the trauma of losing a loved one to suicide and may themselves be at higher risk for suicide and emotional problems Mental pain is the basic ingredient of suicide Edwin Shneidman calls such pain psychache 1 meaning an ache in the psyche Shneidman suggested that the key questions to ask a suicidal person are Where do you hurt and How may I help you If the function of

suicide is to put a stop to an unbearable flow of painful consciousness then it follows that the clinician's main task is to mollify that pain Shneidman 1 also pointed out that the main sources of psychological pain such as shame guilt rage loneliness hopelessness and so forth stem from frustrated or thwarted psychological needs These psychological needs include the need for achievement for affiliation for autonomy for counteraction for exhibition for nurturance for order and for understanding Shneidman 2 who is considered the father of suicidology has proposed the following definition of suicide Currently in the Western world suicide is a conscious act of self induced annihilation best understood as a multidimensional malaise in a needful individual who defines an issue for which the suicide is perceived as the best solution Shneidman has also suggested that that suicide is best understood not so much as a movement toward death as it is a movement away from something and that something is always the same intolerable emotion unendurable pain or unacceptable anguish Strategies involving restriction of access to common methods of suicide have proved to be effective in reducing suicide rates however there is a need to adopt multi sectoral approaches involving other levels of intervention and activities such as crisis centers There is compelling evidence indicating that adequate prevention and treatment of depression alcohol and substance abuse can reduce suicide rates School based interventions involving crisis management self esteem enhancement and the development of coping skills and healthy decision making have been demonstrated to reduce the risk of suicide among the youth Worldwide the prevention of suicide has not been adequately addressed due to basically a lack of awareness of suicide as a major problem and the taboo in many societies to discuss openly about it In fact only a few countries have included prevention of suicide among their priorities Reliability of suicide certification and reporting is an issue in great need of improvement It is clear that suicide prevention requires intervention also from outside the health sector and calls for an innovative comprehensive multi sectoral approach including both health and non health sectors e g education labour police justice religion law politics the media

Surviving the Prison Place Diana Medlicott, 2024-07-01 Suicide in prison is a growing problem across the developed world Originally published in 2001 this book sets out to enlarge understanding of the complexities of suicidal feelings and of the part played by some inalienable features of prison life It does this by presenting and analysing prisoners accounts of their most intimate responses to the deprivations of prison in particular the stringent control and management of their personal time and space These accounts show in more graphic form than previous literature the depth of suffering as well as the range of creative responses produced in prisoners through interaction with the prison environment Prisoners themselves have enormous need for more humane and interactive management of the problem and their accounts show clearly how prisoner expertise could be utilised in profoundly significant ways This book will be of interest to all who research live or work in prison as well as to students and practitioners in criminology penology criminal justice sociology psychology psychiatry and health

Suicide In Prisons Introduction

In the digital age, access to information has become easier than ever before. The ability to download Suicide In Prisons has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Suicide In Prisons has opened up a world of possibilities. Downloading Suicide In Prisons provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Suicide In Prisons has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Suicide In Prisons. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Suicide In Prisons. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Suicide In Prisons, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Suicide In Prisons has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
