**Dynamic Simulation and Virtual Reality in Hydrology and Water Resources Management** Ramesh S.V. Teegavarapu,Chandramouli V. Chandramouli,2021-07-27 Dynamic Simulation and Virtual Reality in Hydrology and Water Resources Management focuses on the understanding use and application of system dynamics simulation and virtual reality approaches for modeling the spatial and temporal behavior of natural and managed hydro environmental systems The book discusses concepts of systems thinking and system dynamics

approach and it furthers understanding of the dynamic behavior of natural and engineering systems using feedbacks and dynamic simulation. Numerous examples of models built using different system dynamics simulation modeling environments are provided. It also introduces concepts related to computer animation and virtual reality based immersive modeling. Applications of systems dynamics simulation with animation and virtual reality approaches for modeling and management of hydro environmental systems are illustrated through case studies. This text is ideal for water resources professionals, graduate students, hydrologic modelers and engineers who are interested in systems thinking, dynamic simulation and virtual reality modeling approaches. It will serve as a valuable reference for engineering professionals who model, manage and operate hydrosystems. Engineering educators will find the book immensely useful to enhance the learning experiences of students. Dr. Ramesh S. V. Teegavarapu is a professor at Florida Atlantic University with expertise in modeling water resources and environmental systems, hydroinformatics and climate change. Dr. Chandramouli V. Chandramouli is a professor at Purdue University Northwest. His expertise is in water resources and environmental modeling integrating artificial intelligence techniques.

*Managing Complex Tasks with Systems Thinking* Hassan Qudrat-Ullah, 2023-11-13. This book is about improving human decision making and performance in complex tasks. Utilizing systems thinking approach, this book presents innovative and insightful solutions to various managerial issues in various domains including agriculture, education, climate change, digital transformation, health care, supply chains and sustainability. Practical insights and operational causal models are systematically presented. The key features of the didactic approach of this book are core knowledge, numerous tables and figures throughout the text, system archetypes and causal loop models. This book serves as a text for college and university courses on Systems Thinking for Management Decision Making in Complex Tasks. Researchers use the developed causal models to design and evaluate various decision aiding technologies. It is used as a source of practical information for a broad community of decision makers, researchers and practitioners concerned with the issue of improving human performance in complex organizational tasks.
