Systems Of Nominal Classification

Samuel MacClintock

Systems Of Nominal Classification:

Systems of Nominal Classification Gunter Senft,2000-08-03 This book first published in 2000 addresses the fundamental linguistic question of how the perceived world is expressed through systems of nominal classification that are grammatically encoded in various languages A team of leading international scholars reviews the whole spectrum of nominal classification from gender systems through to numeral classifiers providing cutting edge theoretical interpretations and empirical case studies based on a wide range of languages The volume presents ideas about the problems of classification advances theory by proposing typological categories and clarifies the interface between anthropological and grammatical work Focusing on systems that have a conceptual semantic basis the contributors reflect and represent approaches in nominal classification research This invaluable reference work will appeal to linguists anthropologists and psychologists alike as well as specialists in languages as diverse as Australian Amazonian Mayan and Japanese *what do we really know about nominal classification systems?* , **Nominal Classification** Marcin Kilarski,2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics Based on an analysis of over 200 genetically and typologically diverse languages the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon grammar and the organization of discourse As a result the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure the diverse functions of grammatical categories linguistic complexity agreement phenomena and the interplay between lexicon and grammar The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier supposedly prescientific accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity *Verb Classification in Australian Languages* William B. McGregor,2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates Systems of Norminal Classification: a Concluding Discussion , *Non-canonical Gender Systems* Sebastian Fedden,Jenny Audring,Greville G. Corbett,2018 This book explores the boundaries of the category of gender and their theoretical significance within the framework of Canonical Typology International experts analyse a variety of gender systems from a range of typologically diverse languages from across the world from South America to Melanesia and from Central Italy to Northern Australia **The Typology and Diachrony of Nominal Classification** Matthias Benjamin

Passer,2016 There are two ways for a language to classify its nouns either by means of classifiers which specify the semantics of the classified noun or by means of grammatical gender which groups all nouns of a language into formal classes This thesis investigates the common assumption that classifier systems may develop into grammatical gender systems Because this diachronic phenomenon has not yet been documented for any language the likeliness that such a development would occur is examined by means of a typological study of synchronic systems In analyzing the data this study adopts a new perspective on the development of nominal classification by separating how the means of formal expression develops from the development of those components that have to do with a system s semantic transparency This twofold account for the data from a variety sample of 40 languages shows that there is indeed a number of systems that lie at the intersection of classifiers and gender systems but that a direct shift from classifier to gender is not likely to occur *The Languages and Linguistics of Mainland Southeast Asia* Paul Sidwell,Mathias Jenny,2021-08-23 The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area The last half century has seen a great increase in work on language contact work in genetic theoretical and descriptive linguistics and since the 1990s especially documentation of endangered languages The book will provide an account of work in these areas focusing on the achievements of SEAsian linguistics as well as the challenges and unresolved issues and provide a survey of the relevant major publications and other available resources We will address Survey of the languages of the area organized along genetic lines with discussion of relevant political and cultural background issues Theoretical descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other areas of interest such as sociolinguistics semantics writing systems etc Resources major monographs and monograph series dictionaries journals electronic data bases etc Grammar sketches of languages representative of the genetic and structural diversity of the region

Anthropological Linguistics ,2005 **Nominal Classification in Asia and Oceania** Marc Allasonnière-Tang,Marcin Kilarski,2023-12-01 Linguists have long been interested in systems of nominal classification due to their diverse functions as well as cognitive and cultural correlates Among others ongoing research has focused on semantic functional and morphosyntactic properties of complex systems such as co occurring gender and numeral classifiers Such approaches have typically focused on the languages of north western South America and Papua New Guinea This volume proposes to fill in a gap in existing research by focusing on Asia based on case studies from languages belonging to a wide range of families i e Austroasiatic Austronesian Dravidian Hmong Mien Indo European Mongolic Sino Tibetan and Tai Kadai as well as the language isolate Nivkh Gender and classifiers in these languages are approached within several different perspectives i e functional typological and diachronic thus revealing complex patterns in their lexical and pragmatic functions as well as origin development and loss Describing and analysing such properties is a unique and innovative contribution of the volume **The Development of Gender as a Grammatical Category** Janet Duke,2009 *The*

Diachrony of Classification Systems William B. McGregor, Søren Wichmann, 2018-05-14 Classification is a popular topic in typological descriptive and theoretical linguistics This volume is the first to deal specifically with the diachrony of linguistic systems of classification It comprises original papers that examine the ways in which linguistic classification systems arise change and dissipate in both natural circumstances and in circumstances of attrition The role of diffusion in such processes is explored as well as the question of what can be diffused The volume is not restricted to nominal systems of classification but also includes papers dealing with the less well known phenomenon of verbal classification Languages from a wide spread of world regions are examined including Africa Amazonia Australia Eurasia Oceania and Mesoamerica The volume will be of interest to linguistic typologists descriptive linguists historical linguists and grammaticalization theorists **Metadata and Semantics Research** Emmanouel Garoufallou, Richard J. Hartley, Panorea Gaitanou, 2015-09-03 This book constitutes the refereed proceedings of the 9th Metadata and Semantics Research Conference MTSR 2015 held in Manchester UK in September 2015 The 35 full papers and 3 short papers presented together with 2 poster papers were carefully reviewed and selected from 76 submissions The papers are organized in several sessions and tracks general track on ontology evolution engineering and frameworks semantic Web and metadata extraction modelling interoperability and exploratory search data analysis reuse and visualization track on digital libraries information retrieval linked and social data track on metadata and semantics for open repositories research information systems and data infrastructure track on metadata and semantics for agriculture food and environment track on metadata and semantics for cultural collections and applications track on European and national projects **Poznań Studies in Contemporary Linguistics**, 2003 **The Dynamics of Nominal Classification** Ruth Singer, 2016-10 The use of grammatical gender in the Australian language Mawng calls into question prevailing ideas about the functions of nominal classification systems Mawng s gender system has a strong semantic basis and plays an important role in the construction of meaning in discourse Gender agreement in verbs is frequently lexicalized creating idioms called lexicalised agreement verbs that are structurally similar to noun verb idioms *Contribuciones Seleccionadas Del 50 Congreso Internacional de Americanistas en Varsovia Y Del Taller Spinoza de Lenguas Amerindias en Leiden, 2000*, 2002 **Santa Barbara Papers in Linguistics**, 1999 **Manusya**, 2010 Rethinking Linguistic Relativity John J. Gumperz, Stephen C. Levinson, 1996-07-11 Linguistic relativity is the claim that culture through language affects the way in which we think and especially our classification of the experienced world This book reexamines ideas about linguistic relativity in the light of new evidence and changes in theoretical climate The editors have provided a substantial introduction that summarizes changes in thinking about the Sapir Whorf hypothesis in the light of developments in anthropology linguistics and cognitive science Introductions to each section will be of especial use to students Personal Efficiency Samuel MacClintock, 1926

Systems Of Nominal Classification Introduction

In the digital age, access to information has become easier than ever before. The ability to download Systems Of Nominal Classification has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Systems Of Nominal Classification has opened up a world of possibilities. Downloading Systems Of Nominal Classification provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Systems Of Nominal Classification has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Systems Of Nominal Classification. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Systems Of Nominal Classification. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Systems Of Nominal Classification, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Systems Of Nominal Classification has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available

and embark on a journey of continuous learning and intellectual growth.

FAQs About Systems Of Nominal Classification Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Systems Of Nominal Classification is one of the best book in our library for free trial. We provide copy of Systems Of Nominal Classification in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Systems Of Nominal Classification. Where to download Systems Of Nominal Classification online for free? Are you looking for Systems Of Nominal Classification PDF? This is definitely going to save you time and cash in something you should think about.
