The Techniques of Tablet Weaving Peter Collingwood, 2021-10-31 When Techniques of Tablet Weaving was first published in 1982 it sold out almost immediately Weavers fiber artists and collectors hungry for the vast and carefully organized repository of information it contained have spent years excitedly sharing dog eared paperback editions and roughly photocopied excerpts of this one of a kind volume No commercially published book before or since has captured the amount and quality of information and research on the art of tablet weaving also known as card weaving Finally long deprived cardweaving enthusiasts can own their very own copy of Peter Collingwood s landmark book thanks to this high quality 2015 reprint complete with dozens of detailed photographs pattern examples and step by step instructions for each of the techniques presented In addition to instructional information Techniques of Tablet Weaving contains pages of historical context for a variety of weaving techniques with clear and helpful tips on reproducing them precisely as well as modern variations on the classics

Prehistoric Textiles E. J.W. Barber, 1991 This monograph attempts to revise present ideas of the origins and early development of textiles in Europe and the Near East Using linguistic techniques as well as methods from palaeobiology it demonstrates that spinning and pattern weaving existed far earlier than has been supposed

Plane Algebraic Curves BRIESKORN, KNÖRRER, 2013-11-11

The Competition of Fibres Wolfram Schier, Susan Pollock, 2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other Technological and economic practices for example the strategies by which raw materials were acquired and prepared in the production of textiles play a major role in the papers collected here Contributions investigate the beginnings of wool use in western Asia and southeastern Europe The importance of wool in

considerations of early textiles is due to at least two factors First both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat This raises the question of when and where woolly sheep emerged a question that has not up to now been resolvable by genetic or other biological analyses Second wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day Despite the importance of wool as a fiber resource contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers both plant and animal Only within a framework that takes into account historically and regionally variable strategies of procurement processing and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past With relatively rare albeit sometimes spectacular exceptions archaeological contexts offer only poor conditions of preservation for textiles As a result archaeologists are dependent on indirect or proxy indicators such as textile tools e g loom weights spindle whorls and the analysis of faunal remains to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past
