## **Tackling Transportation:**

Tackling Transport Helmuth Trischler, Stefan Zeilinger, 2003 In this book historians from museums and academia examine transport artefacts and the systems of mobility in which they are embedded Large artefacts such as the Stephenson's Rocket locomotive a Lockheed F 104 Starfighter a Ford Model T are impressive manifestations of engineering ingenuity They help museum visitors understand the design and use of the technologies that move people and goods But they are also historical icons so different audiences be they professional historians of technology or casual visitors will interpret them in different ways In a transport exhibition individual artefacts can dominate a visitor's attention overwhelming the themes expressed by other material The power of such an artefact helps to attract interest but at the same time endangers its incorporation into a larger system Curators have to find ways to demonstrate the systemic nature of transport by integrating these objects with others the smaller component artefacts such as electrochemical batteries pneumatic tyres and dashboards and the social artefacts such as drivers consumers rules and institutions The authors consider a variety of transport artefacts from pioneering steam locomotives and early automobile interiors to jet engines and the automatically guided cars of the future Those with curatorial responsibilities also reflect on how theoretical notions about transport can be expressed in the practical context of a museum and how a reappraisal of visitors' responses to transport artefacts is leading to new ways of showcasing the history of mobility

*Communication and Intelligent Systems* Harish Sharma, Vivek Shrivastava, Ashish Kumar Tripathi, Lipo Wang, 2024-06-20 This book gathers selected research papers presented at the Fifth International Conference on Communication and Intelligent Systems ICCIS 2023 organized by Malaviya National Institute of Technology Jaipur India during December 16-17 2023 This book presents a collection of state-of-the-art research work involving cutting-edge technologies for communication and intelligent systems Over the past few years advances in artificial intelligence and machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies The book presents single and multi-disciplinary research on these themes to make the latest results available in a single readily accessible source The work is presented in three volumes

*MICAI 2006: Advances in Artificial*

*Intelligence* Alexander Gelbukh, Carlos Alberto Reyes-Garcia, 2006-11-07 This book constitutes the refereed proceedings of the 5th Mexican International Conference on Artificial Intelligence MICA I 2006 held in Apizaco Mexico in November 2006 It contains over 120 papers that address such topics as knowledge representation and reasoning machine learning and feature selection knowledge discovery computer vision image processing and image retrieval robotics as well as bioinformatics and medical applications *Applied Research in Environmental Economics* Christoph Böhringer, Andreas Lange, 2006-03-30

Sustainable development climate policy and biodiversity conservation are examples of issues on the current political agenda in many countries These themes are also subject to economic research and economic insights are increasingly finding their way into the design of environmental policy Still the reception of academic findings by policy makers as well as the timely identification of policy relevant questions by economic researchers often seem to be problematic This volume attempts to vitalise the exchange between policy makers and academics It offers a snapshot of environmental economic research on a range of policy relevant problems Academic contributions are complemented by views of policy makers on priority fields in environmental policy the usefulness of academic research for decision making and requirements to applied research in the future Universal Design Edward Steinfeld, Jordana Maisel, 2012-03-14

A much needed reference to the latest thinking in universal design Universal Design Creating Inclusive Environments offers a comprehensive survey of best practices and innovative solutions in universal design Written by top thinkers at the Center for Inclusive Design and Environmental Access IDeA it demonstrates the difference between universal design and accessibility and identifies its relationship to sustainable design and active living Hundreds of examples from all areas of design illustrate the practical application of this growing field Complete in depth coverage includes The evolution of universal design from its roots in the disability rights movement to present day trends How universal design can address the needs of an aging population without specialization or adaptation to reduce the need for expensive and hard to find specialized products and services Design practices for human performance health and wellness and social participation Strategies for urban and landscape design housing interior design product design and transportation Destined to become the standard professional reference on the subject Universal Design Creating Inclusive Environments is an invaluable resource for architects interior designers urban planners landscape architects product designers and anyone with an interest in how we access use and enjoy the environment
