Time of Troubles Roland Boer, Christina Petterson, 2017-05 Economic realities have been increasingly at the center of discussion of the New Testament

and early church Studies have tended to be either apologetic in tone or haphazard with regard to economic theory or both either imagining the ancients as involved in primitive economic relationships or else projecting the modern capitalist preoccupation with markets and the enterprising individual back onto first century realities Roland Boer and Christina Petterson blaze a new trail relying on the expansive work on the Roman economy of G E M de Ste Croix who was relatively uninterested in the New Testament however and on the theoretical framework of the Regulation school Theoretically flexible and responsive to historical data Regulation theory gives appropriate regard to the centrality of agriculture in the ancient world and finds economic instability to be the norm except for brief episodes of imposed stability Boer and Petterson find the Roman world in crisis as slavery expands transforming the agricultural economy so that slave estates could supply the needs of the polis Successive chapters describe aspects of the economic crisis in the first century and turn at last to understand the ideological role played by nascent Christianity Economics and Empire in the Roman World Matthew J. M.

Coomber,2025-01-16 Over the past few decades the study of biblical economics has developed into an important subfield of biblical studies This subfield uses textual and archaeological evidence to uncover the economic realities behind biblical literature resulting in greater understandings of the lives and possible intentions of those individuals and communities that composed these religious texts and also of their potential relevance or lack thereof to the communities that continue to receive them Economics and Empire in the Roman World has brought together eight scholars of biblical economics to create a repository of what is understood about the socioeconomic realities of those who penned and first received what were to become the Christian scriptures In addition to serving the research and teaching interests of biblical scholars this volume has also been created for the benefit of economic historians anthropologists and sociologists *Eutopia* Samuel Whitfield Thackeray,1901 The Economy of Salvation Luigino Bruni,2019 This book provides a systematic commentary on the first two books of the Bible Genesis and Exodus Drawing on these two essential books it subsequently offers new readings of several issues relevant for today s economic and social life Western Humanism has its own founding cultural and symbolic codes One of them is the Bible which has for millennia provided a wealth of expressions on politics and love death and economy hope and doom Biblical stories have been revived and reinterpreted by hundreds of generations and have informed many of our most beautiful works of art not to mention the dreams of children and adults alike And they have given us hope during the many painful times of exile and oppression that we have gone through and are going through still Among the books of the Bible in both the Jewish and Christian traditions Genesis and Exodus represent the true foundation of biblical theology and anthropology but in them we also find the roots of the culture of markets money and commerce which would go on to flourish during the Middle Ages and ultimately form the spirit of capitalism Max Weber or the religion of capitalism Walter Benjamin in the modern era This book examines the Biblical foundations of our conception of social relations and offers new insights on the present economic and social discourse
