Breathnach, 1999-03-19 *Dermatopathology Compass* Vladimir Vincek, 2021-05 This book is intended for residents of dermatology and pathology The sheer number of different skin diseases makes the field of dermatopathology very hard to master For a novice in the field it is easy to get lost in the myriad of names and patterns that are often so similar but still different Many years ago as a new resident studying the field of dermatopathology I remember many times where I felt like I was lost in the woods Therefore my goal for this book was to serve as a compass to residents to orient themselves in their dermatopathology journey The chapters are organized so that the text description and photos are on the same page I tried to provide low and high magnification photos for each disease as that is the way slides are examined under the microscope I also tried to describe two diseases with similar histopathology on

the same page so that they can be compared Toward the end of each chapter after describing all entities I provided a summary page with recommendations for how to approach the diseases described in that chapter Every chapter ends with composite photos of all diseases in that chapter for a quick overview Some diseases are intentionally described in multiple chapters because of their overlapping histology My hope is that *Dermatopathology Compass* will help all readers to navigate through the maze of dermatopathology more easily
