Zambia International Monetary Fund, 2005-02-01 This report on the Observance of Standards and Codes data module provides an assessment of Zambia's macroeconomic statistics against the recommendations of the General Data Dissemination System (GDDS) complemented by an assessment of data quality based on the IMF's Data Quality Assessment Framework. Overall, the lack of effective coordination among all statistical producing agencies and users impedes the quality and transparency of statistics. In addition, no systematic program to assess users' needs is in place. All agencies have limited practices in informing the public of internal government access to statistics before wider data dissemination.

Zambia International Monetary Fund. African Dept., 2017-10-25 This Selected Issues paper assesses the sustainability of Zambia's current fiscal policies and public debt. Large fiscal imbalances and rapid increase in government debt since 2011 have raised concern about the sustainability of fiscal policies in Zambia. Fueled by the rapid exchange rate depreciation in 2014-15 and the heavy reliance on external sources to finance the growing fiscal imbalances, public external debt doubled in 2015 compared with 2014. The institutional framework for the budget process and the Medium Term Expenditure Framework need to be strengthened. Poor commitment controls which led to significant accumulation of payment arrears need to be addressed. A sound Medium Term Debt Management Strategy is required to reduce public sector debt vulnerability.

Zambia International Monetary Fund. African Dept., 2025-08-05 Zambia's economy has stabilized with average per capita income growth of about 2 percent over 2022-24 supported by continued reform efforts. Inflationary pressures are gradually subsiding. In 2024, real GDP growth is estimated at 4 percent, well above earlier projections, underpinned by stronger mining and services performance and prioritizing electricity access to productive sectors. The authorities' commitment to reform is yielding dividends. Macroeconomic stability is improving, fiscal consolidation is progressing, and reserve buffers are strengthening. However, poverty and inequality remain high, and the economic outlook is vulnerable to external shocks, climate events, and domestic political pressures ahead of the 2026 elections. **The Builder**, 1883 **Pockets of Effectiveness**

**and the Politics of State-building and Development in Africa** Sam Hickey, 2023-07-03 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International License. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Why do certain parts of the state in Africa work so effectively despite operating in difficult governance contexts? How do pockets of bureaucratic effectiveness emerge and become sustained over time? And what does this tell us about the prospects for state building and development in Africa? Repeated economic and social crises have demanded that development thinkers and policy actors have had to engage with the critical role that states play in delivering development. **Pockets of Effectiveness and the Politics of State building and**

Development in Africa shows that politics is the driving factor that shapes how well state agencies perform their roles It deploys a new conceptual framework the power domains approach to explore the shifting fortunes of key state agencies in five countries Ghana Kenya Rwanda Uganda and Zambia over the past three decades Our original research reveals when how and why political rulers decide to build effective state agencies and enable them to deliver certain forms of economic development often through forming strategic coalitions with senior bureaucrats and with international support and also when this support falters and gives way to a politics of survival Comparative analysis identifies two potential trajectories towards state building in Africa each shaped by different configurations of social and political power The book critiques the role that international development agencies have played in mis shaping the state in Africa and suggests a new strategic agenda for building the state capacities required to deliver sustained development at the current juncture The book closes with critical commentaries from two leading scholars in the field to help place our work in context and establish the next steps for research and strategy in this increasingly important area of development theory and practice
