**The Burden of Proof in Comparative and International Human Rights Law** Juliane Kokott, 2023-12-28 This book explores how courts decide or ought to decide in situations of uncertainty A Court must always decide the case before it even if the relevant facts remain unclear The question then arises which party benefits and which party is burdened by that uncertainty In these cases the Court must apply the rules on the burden of proof or more precisely the burden of persuasion Their importance for the individual claimant is obvious The comparison of two domestic systems one based on common law and the other a traditional code based legal order with regard to the issue of burden of proof helps to clarify the terminology and lays the ground for dealing with the burden of proof in international human rights law Without knowing what can be understood by the term burden of proof under domestic law international lawyers with different domestic law backgrounds are in danger of misunderstanding each other This may lead to obscuring the problems connected with court decisions involving uncertainty The study also deals with uncertainties with regard to legislative general in contrast to adjudicative individual facts and with uncertainties in the framework of predictions in contrast to uncertainties relating to historic facts It attempts to prepare the ground for dealing more consciously and more consistently with problems of uncertainty in international human rights law International courts due to their geographical and cultural distance from the case usually have less access to the underlying facts Nevertheless in order to protect human rights effectively international courts and tribunals cannot always restrict themselves to reviewing the law but may also have to decide on the facts Thus issues relating to decision making on the basis of uncertain facts including the burden of persuasion are even more important in international than in domestic human rights law

### **Burdens of Proof in Modern Discourse** Richard H.

Gaskins, 1995-02-22 Public and professional debates have come to rely heavily on a special type of reasoning the argument from ignorance in which conclusions depend on the lack of compelling information I win my argument says the skillful advocate unless you can prove that I am wrong This extraordinary gambit has been largely ignored in modern rhetorical and philosophical studies Yet its broad force can be demonstrated by analogy with the modern legal system where courts have long manipulated burdens of proof with skill and subtlety This legal philosophical and rhetorical study by Richard H Gaskins provides the first systematic treatment of arguments from ignorance across a wide range of modern discourse from constitutional law scientific inquiry and moral philosophy to organizational behavior computer operation and personal interaction Gaskins reviews the historic shifts in constitutional proof burdens that have shaped public debate on fundamental rights and by analogy on the fundamental status of intellectual and cultural authority He shows how similar shifts have dominated polemical battles between scientific and ethical modes of authority affecting both academic and popular discussion Finally he discovers the philosophical roots of default reasoning strategies in the arguments of Kant and nineteenth century Kantian schools Concluding that shifting proof burdens are inescapable in a world of scientific and moral

uncertainty Gaskins emphasizes the common strategic ground shared by dogmatic and skeptical reasoning Using Hegelian strategies he describes a more pluralistic temper that can move critical thinking beyond polemics and strengthen our capacities for common discourse
