**The Calcium Channel: Structure, Function and Implications** Martin Morad, Winifred G. Nayler, Stanislav Kazda, Matthias Schramm, 2012-12-06 This is the first book to summarize experimental results from the new rapidly expanding field of research into the calcium channel in cell membrane Calcium is an ubiquitous messenger of various cellular functions Its fundamental role in the regulation of cardiac contractions has long been recognized Drugs counteracting some actions of calcium ions namely calcium antagonists have since become essential to research In the last decade it has been established that calcium ions reach their target intracellular system by passing through specialized calcium channels in the membrane Recently improved experimental techniques combined with the discovery of highly specific Ca channel ligands have dramatically enlarged our knowledge of the molecular structure and function of such channels The contributions by leading world specialists shed new light on both basic science and possible clinical implications for cardiovascular pharmacology endocrinology and neuropharmacology

Intracellular Calcium Regulation Felix Bronner, 1990-03 Intracellular Calcium Regulation Editor Felix Bronner A notable development in biological research is the recent widespread interest in the role played by calcium in cellular metabolism Calcium homeostasis has been studied intensively for many years and mechanisms by which calcium absorption excretion and bone deposition are effected and regulated are beginning to be understood in detail It now appears there may exist a parallel between the maintenance and regulation of intracellular and extracellular calcium This volume presents up to date information on intracellular calcium regulation and thus provides a foundation for studies that aim to explore the relationship between intracellular and extracellular calcium metabolism Intracellular Calcium Regulation examines in detail what happens to calcium inside the cell and offers authoritative discussions on such topics as calcium fluxes defining the role played by the plasma membrane in regulating the cellular calcium level the application of tracer techniques to an analysis of the cellular calcium pool the compartments making up the pool and the rates of exchange between compartments processes of calcium entry into the cell describing entry into cells that do not fire action potentials as well as three types of voltage sensitive calcium channels including their distribution pharmacology molecular properties and modulation organelles such as the endoplasmic reticulum the Golgi complex lysosomes or mitochondria and their role in regulating intracellular calcium levels the new exciting field of calcium binding or calcium modulated proteins such as troponin C parvalbumin S 100 proteins calbindins and calmodulin as well as some novel calcium binding proteins like the 42C and 42A proteins calcyclin and

caltractin calcium efflux analyzing the role and function of the plasma membrane calcium pump and the Na Ca<sup>2</sup> exchanger including the kinetics of ATP hydrolysis how calcium transport and ATP hydrolysis are linked the kinetics and properties of the sodium calcium exchange its regulation and role in such specialized cells as retinal rods and cardiac myocytes calcium transport as carried out by resting stimulated and excitable cells with emphasis on activated phospholipase C involvement of the G proteins and protein kinase C calcium transport as carried out by the specialized transport cells of intestine and kidney entry via calcium channels intracellular diffusion as facilitated by the calcium binding proteins and extrusion via the Ca ATPase Intracellular Calcium Regulation will be of interest to researchers and graduate students in the areas of biochemistry biophysics cell biology nutrition gastroenterology nephrology and anatomy **American Journal of Physiology** ,1992 Vols for 1898 1941 1948 56 include the Society s proceedings primarily abstracts of papers presented at the 10th 53rd annual meetings and the 1948 56 fall meetings **Arch Int Pharmacodyn Ther** ,1989 Summaries at end of articles
