use of people of both sexes The proper balance of these institutions is a prerequisite of well being both of the care givers and of the care receivers and also for satisfactory gender relations The chapters in this book focus on the following sub topics gender and welfare regimes gender well being and the provision of care in the family and the household and gender and well being in the labour market They emphasise the interdependence of social and labour market policies in the context of fundamental changes in both working patterns the increase in female labour force participation rates and social needs including population ageing and demonstrate that we need a more integrated approach to welfare policy which takes account not only of basic welfare entitlements but also the need for supportive forms of service provision and employment regulation
