The Little Of Personal Development:

Handbook of Personality Development Dan P. McAdams, Rebecca L. Shiner, Jennifer L. Tackett, 2021-04-02 Bringing together prominent scholars this authoritative volume considers the development of personality at multiple levels from the neuroscience of dispositional traits to the cultural shaping of life stories Illustrated with case studies and concrete examples the Handbook integrates areas of research that have often remained disparate It offers a lifespan perspective on the many factors that influence each individual's psychological makeup and examines the interface of personality development with health psychopathology relationships and the family Contributors provide broad based up to date reviews of theories empirical findings methodological innovations and emerging trends See also the authored volume *The Art and Science of Personality Development* by Dan P McAdams [Action and Self-Development](#) Jochen Brandtstadter, Richard M. Lerner, 1999-08-24 This volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality and discussing their role in human development As the contributions make clear action is an integrative concept that forms the bridge between our psychological biological and sociocultural worlds Action is also integrative in the sense of entailing motivational emotional and cognitive systems and this integration too is well represented in the chapters Action is defined and distinguished from behavior according to its intentional quality Thus a constantly recurring theme in the volume involves the dialectic of action intentionality and specifically the questions of how and when these concepts are to be distinguished For action theorists action as distinguished from behavior constitutes the fundamental mechanism of human development This commitment is detailed in several essays that explore the life span implications of action This timely volume will be must reading for all who want to learn about or stay current with contemporary action theoretical approaches to human development Willis F Overton Temple University The present volume advances the view that we cannot go far in understanding development over the life span without paying heed to self reflective processes In a reciprocal way self reflection links developmental change in the ways in which the person constructs his or her own development over the life span Development action and intentionality exist then in an intimate relationship As development forms the social and historical settings within which intentional activity is embedded thus become indispensable categories for developmental theory and research Due to their potential to integrate culture history and personality action theoretical concepts have made strong inroads in many areas of social and behavioral research Within the field of developmental psychology researchers have come to recognize that developmental patterns and their variation across historical and social contexts cannot easily be reduced to invariant laws Instead they reflect the agency of both the culture and the person Issues of intentional self development gain particular importance within the developmental settings of modernity Under conditions of cultural acceleration globalization and pluralization of life forms normative scripts and timetables of development have become blurred and people are increasingly forced to take a planful self monitoring and optimizing stance toward their own behavior

and development As will become evident throughout this ground breaking book an action perspective on development covers a broad spectrum of theoretical approaches Concepts such as personal goals personal projects life themes meaning life planning compensation or intentional self development have become the nuclei of innovative research programs The chapters collected in this volume by scholars on the forefront of action theory and research provide an indication of the promise that these notions hold for life span developmental psychology motivation research and research on aging
