in the moment needn't be limited to simple diary keeping and fill in journals instead you can capture it with your lens

Bestselling author Matthew Johnstone's latest book *Capturing Mindfulness* is a natural follow on from his last book *Quiet the Mind* which came out in 2012. Matthew has been practicing what he terms photopresent for the last 15 years and believes that next to meditation this is one of the most creative and enjoyable ways to attain mindfulness in day to day life. The very essence of photography after all is all about focus and capturing the moment. Matthew is fascinated by light colour composition and most importantly how he can see the world differently. For him having camera in your hands is the reminder to consciously slow everything down from your breath to your walk to your thoughts and begin to really observe your surroundings as if seeing them for the first time. Mindfulness photography is about seeing something that no one else can capturing something that will never happen again and finding beauty where it doesn't typically exist. When we become more consciously aware of where we are what we're doing and what we're thinking life can become calmer more enjoyable and generally more manageable.
