# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees, IT staff, and the employees who will also need to manage it.

The way to build a hybrid work model is to first ask what people want for themselves, and then to build a model that meets those needs.

How do you know? About how you should design a successful hybrid workplace? There are several ways to find out. You can survey your employees, conduct focus groups, or use other methods to understand their needs and preferences. You can also look at what other organizations are doing and learn from their experiences.
