Building Performance Evaluation Wolfgang F.E. Preiser, Andrea E. Hardy, Ulrich

Schramm,2017-08-30 The main aim of this book is to present an intriguing retrospective of Building Performance Evaluation BPE as it evolved from Post Occupancy Evaluation POE over the past 25 years On one hand this is done by updating original authors chapter content of Building Evaluation the first edition published in 1989 That in turn is augmented by an orientation toward current and future practice on the other including new authors who are engaged in ongoing cutting edge projects Therefore individual methodology oriented chapters covering the fundamental principles of POE and BPE go along with major thematic chapters topics of which like sustainability or integration of new technologies are addressed in a diversity of case studies from around the globe Research methodologies and framework of POEs continue to evolve POEs are one step on the larger scale of BPE in understanding how buildings function after they are occupied This resource helps architects building owners and facility managers understand the implications and reactions to the facilities that they designed built and or commissioned By considering the whole process from conception to future uses of the building there can be a more holistic approach to the planning programming design construction occupancy and future adaptability of the structure This book is dedicated to first editor Wolfgang F E Preiser who passed away during the process of editing and reviewing chapters of this volume *Sustainable Design: Eco Friendly Green Building Product Graphic 2020 Planner Calendar Organizer Daily Weekly Monthly Dms Books*,2019-02-13 You ll love this Sustainable Design 2020 Planner Amazing quality book that makes an ideal gift for friends and family Perfect book to write in daily take notes and jot down ideas 110 lightly lined writing pages provide plenty of writing and doodle space Compact size 6 wide x 9 high fits in most purses backpacks and totes Acid free archival quality paper takes pen or pencil beautifully Durable matte sturdy paperback cover perfectly bound for an expert finish The cover is professionally designed and the interior is high quality 60 stock DMS Books prides itself on providing a wide variety of useful journals notebooks and diaries for every occasion This design is also available with plain lined Cornell note taking system college ruled dot grid story board planner calendar and doodle sketchbook interiors plus many more Please enjoy your purchase xxx Actor Networks of Planning Yvonne Rydin,Laura Tate,2016-02-12 Planning is centrally focused on places which are significant to people including both the built and natural environments In making changes to these places planning outcomes inevitably benefit some and disadvantage others It is perhaps surprising that Actor Network Theory ANT has only recently been considered as an appropriate lens through which to understand planning practice This book brings together an international range of contributors to explore such potential of ANT in more detail While it can be thought of as a subset of complexity theory given its appreciation for non linear processes and responses ANT has its roots in the sociology of scientific and technology studies ANT now comprises a rich set of concepts that can be applied in research theoretical and empirical It is a relational approach that posits a radical symmetry between social and material actors or actants It suggests the importance of dynamic processes by which networks of relationships become formed shift and have effect And while not inherently normative ANT has the potential to strengthen other more normative domains of planning

theory through its unique analytical lens However this requires theoretical and empirical work and the papers in this volume undertake such work This is the first volume to provide a full consideration of how ANT can contribute to planning studies and suggests a research agenda for conceptual development and empirical application of the theory *Proceedings of the 2024 International Conference on Urban Planning and Design (UPD 2024)* Mujahid Ali, Ping Xiang, Mohamed A.
